Academic Calendar
2023-2024
Department of Zoology

| PART I: SEMESTER 1 (under NEP) | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| CORE COURSE-1: Cell Biology Major/Minor/MDC: CC1 | | |
| 3 Credits | 50 Hours | |
| Full Marks 75 | | |
| First Semester: July- December | | |
| Topic | Name of the Teacher | No. of Hours |
| <p>Unit 1: Plasma Membrane Structure of the Plasma Membrane: Lipid Bilayer (Phospholipids and Cholesterol), Peripheral and Integral Membrane proteins, Glycolipids and Glycoproteins (basic concept of Glycocalyx), Fluid Mosaic Model with special reference to Lipid rafts, Mobility of membrane lipids (FRAP assay) and Mobility of Membrane Proteins (Frye-Edidin Experiment); Cell-cell junctions; Transport through plasma membrane.</p> | S. Biswas | 7 |
| <p>Unit 2: Cytoplasmic organelles I Basic concepts on Ultrastructure of ER, Golgi and Lysosome; Overview of Protein sorting; ER Morphology, Targeting proteins to ER, The Signal hypothesis; Insertion of proteins into ER membrane, Protein folding and processing in ER, Export of proteins and lipids from ER; Golgi Apparatus; Morphology, Protein glycosylation within Golgi, Protein sorting and export from Golgi apparatus; Mechanism of Vesicular Transport: Cargo selection, coat proteins and vesicle budding, Vesicle fusion.; Lysosome: Polymorphism, Lysosomal acid hydrolases, Endocytosis and lysosome formation.</p> | S. Hansda | 8 |
| <p>Unit 3: Cytoplasmic organelles II Mitochondria: Structure, Semi-autonomous nature, Mitochondrial DNA, Endosymbiotic hypothesis Mitochondrial Respiratory Chain, Chemiosmotic hypothesis and Oxidative Phosphorylation with reference to ATP Synthase and ATP synthesis Peroxisomes: Structure and Functions; Centrosome and its organization.</p> | P. Bhowmick | 5 |
| <p>Unit 4: Cytoskeleton Structure and Types: Microtubules, Actin filaments, and</p> | S. Biswas | 4 |

| | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|------------------|
| <p>Intermediate filaments; Basic composition and function of ECM; Cell matrix Interactions (Integrins).</p> | | |
| <p>Unit 5: Nucleus Nuclear envelope, nuclear pore complex (transport not included), Kinetochore and centromeric DNA; Chromatin and levels of its packaging. Euchromatin & Heterochromatin, Position effect variegation. Chromatin remodeling complex.</p> | <p>A. Ray</p> | <p>5</p> |
| <p>Unit 6: Cell Cycle Cell Cycle: Phases of the eukaryotic cell cycle, Protein Kinases and Cell cycle regulation, MPF, Growth factors and regulation of G1-Cdks, S phase and regulation of DNA replication, DNA damage checkpoints; Cell Death: Caspases, Bcl-2 family, Intrinsic (Death receptors) and Extrinsic Pathway (apoptosome); Cancer: Basic Concept of Protooncogene [Ras] & Tumor suppressor genes [Rb and p53] Different ways of activation of a protooncogene to Oncogene.</p> | <p>A. Ray</p> | <p>15</p> |
| <p>Unit 7: Cell Signalling Signalling system: Modes of cell-cell signalling; Types of Signalling molecules Signalling receptors: Types and example with special reference to regulation of G protein, Adenyl cyclase-cAMP, Enzyme linked Receptors: RTK (ras-raf) and JAK/STAT</p> | <p>P. Bhowmick</p> | <p>5</p> |
| <p>Unit 8: Tools and Techniques in Cell Biology</p> <ul style="list-style-type: none"> • Animal Cell Culture: Primary cell culture and Cell line. • Subcellular fractionation and Ultracentrifugation. • Freeze fracture Replication and Freeze Etching • Principle of Light Microscope: Bright field, Phase contrast microscope, Fluorescence Microscope • with reference to FRET, Principle of SEM & TEM. • Cryofixation and use of frozen specimen; Specimen Preparation for Electron Microscopy | <p>S. Sarkar, R. Das</p> | <p>5</p> |

| SEC-1: Applied Entomology | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| Major; SEC-1-TH | | |
| 3 Credits | 50 Hours | |
| Full Marks 75 | | |
| First Semester: July- December | | |
| Topic | Name of the Teacher | No. of Hours |
| <p>Unit 1: Basics of Entomology Insect diversity and adaptation: Morphological adaptation of insects: Head and antenna; Mouthparts of honey bee and cockroach; Thorax and thoracic appendages- legs and wings [General concept]. Physiological adaptation in cockroach: Digestive system: Alimentary canal and digestive glands, digestion; Respiratory organs and mechanism of gaseous exchange; Sense organs compound eyes, chemoreceptors. General Characteristics of Class Insecta and living orders with examples: Orthoptera, Dictyoptera, Hemiptera, Coleoptera, Lepidoptera, Diptera, Hymenoptera, Anoplura, Siphonaptera (Imms, A.D., 1938); Ticks and Mites: General features; difference between ticks and mites; Soft ticks and Hard ticks.</p> | S. Sarkar | 12 |
| <p>Unit 2: Medical Entomology Concept of Vectors: Mechanical and biological vectors, modes of transmission; Biological vector and disease cycle. Biology of <i>Anopheles</i>, <i>Culex</i> and <i>Aedes</i>: Study of mosquito borne diseases- Malaria, Dengue, and Filariasis; control of mosquitoes. Biology of <i>Musca domestica</i>: Disease relationship; control of house fly. Biology and systematics of Bed bug <i>Cimex lectularius</i>; disease relationship; Control of Bed Bug. Ticks as Causative agents and Vectors: Rickettsiosis, Tick-borne encephalitis.</p> <p>Forensic Entomology: General perceptions and status of Forensic entomology; Insects and other arthropods of forensic importance; Pattern of insect succession on carcass; Postmortem Interval (PMI) and its estimation process; Applications and limitations of Forensic Entomology</p> | A. Ray | 8 |
| <p>Unit 3: Agricultural Entomology Concept of insect pest; Economic Injury Level (EIL), Economic Threshold Level (ETL), Dynamics of EIL; Pests of major crops (Life cycle, Nature of damage and control measures): Pests of Paddy, Scirpophagaintertulus; Pests of Jute, Anomissabulifera; Pests of brinjal, Leucinodesorbonalis; Stored grain pest: Sitophilusoryzae; Invasive insect pests of India and their</p> | S. Sarkar | 6 |
| | S. Biswas | 14 |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|
| <p>consequences. Insect Pest control: Chemical, Mechanical, Cultural and Biological control measures; Integrated Pest Management (IPM) Study of appliances used in pest control: Dusters; Sprayers- categories of sprayers, agricultural Aircrafts; Granule applicator; soil injectors.</p> <p>Unit 4 Sericulture Types of Silk Moths with special reference to their scientific name, geographical distribution, and host plants. Life cycle of <i>Bombyx mori</i>; Structure of Silk Gland; Voltinism, Rearing of mulberry silkworm; Reeling and extraction of silk; Mulberry cocoon management; Mulberry plant types and cultivation; Common diseases and pests of mulberry silkworm and their control measures; Prospects of Sericulture in West Bengal; employment potential in sericulture</p> <p>Unit 5 Apiculture Various domesticated species of Honeybee; Social organization and life cycle of Honeybee; Modern method of Beekeeping: Newton Box and Langstroth Box; extraction of honey and composition of honey; Pests, Parasites and Diseases and their control measures; Bee-economy: Apiculture products and their uses.</p> | <p>R. Das</p> <p>5</p> <p>S. Hansda</p> <p>5</p> |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|

SEC G For MDC

Applied Zoology

3 Credits

50 hours

Full Marks 75

First Semester: July- December

| Topic | Name of the Teacher | No. of Hours |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|---------------------|
| <p>Unit I: Agricultural Entomology Pest- definition and types (major and minor pests with example); Lifecycle, nature of damage and control of Pests: <i>Scirpophaga incertulus</i> of paddy, <i>Anomis sabulifera</i> of Jute, Bandicoota– stored house pest; Insect Pest control: Chemical, Mechanical, Cultural and Biological control measures; Integrated Pest Management (IPM).</p> <p>Unit II: Sericulture Types of Silkworms with special reference to their scientific name, geographical distribution and host plants; <i>Bombyx mori</i>: Silk gland, Composition of silk, Uses of silk; Lifecycle; Rearing, Extraction and Reeling of mulberry silk; Silkworm diseases, pests</p> | <p>S. Biswas</p> <p>6</p> <p>R. Das</p> <p>8</p> | |

| IDC-1: Animal Biology | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| 3 Credits | 50 hours | |
| Full Marks 75 | | |
| First Semester: July- December | | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1: Animal Diversity Phylum Characters and example: [Non-chordates-Porifera, Cnidaria, Ctenophora, Platyhelminthes, Nematelminthes, Annelida, Arthropoda, Mollusca and Echinodermata]; Chordata | R. Das | 10 |
| Unit 2: Genetics <ol style="list-style-type: none"> 1. Mendelian Principles and Laws of inheritance 2. Linkage and Recombination basic Concepts 3. Sex Determination with reference to Drosophila [only genic balance theory 4. Chromosomal Aberration [Structural and Numerical] | S. Biswas | 12 |
| Unit 3: Biodiversity and Wildlife <ol style="list-style-type: none"> 1. Biodiversity: Definition, types and value 2. Biodiversity: Indices [Shannon & Simpson] 3. Conservation: in situ and ex situ [outline idea] 4. Conservation Priority: Hotspot, Megadiversity, Sensitive Ecosystem 5. 5. Indigenous Knowledge and PBR: Basic Concepts | S. Biswas | 15 |
| Unit 4: Insect Vectors <ol style="list-style-type: none"> 1. Concept of Vector: Biological and Mechanical Vectors with examples 2. Disease cycle & Reservoir Concept 3. Major Vectors: Mosquito (Anopheles sp. & Aedes sp.) Life cycle, control, role as vector. | S. Biswas | 8 |
| Unit 5: Laboratory techniques and Instrumentation <ol style="list-style-type: none"> 1. Basics of Light Microscopy 2. Principles and Application of Colorimetry 3. Principles and application of Ultracentrifugation | S. Sarkar | 5 |

| PART I: SEMESTER 2 (under NEP) | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| CORE COURSE-2: Biochemistry Major/Minor/MDC; CC2 | | |
| 3 Credits | 50 Hours | |
| Full Marks 75 | | |
| Second Semester: January- June | | |
| Topic | Name of the Teacher | No. of Hours |
| <p>Unit 1: Carbohydrates Structure, classification and properties of Monosaccharides (aldose and ketose), Disaccharides, Polysaccharides; Isomerism of monosaccharides (D and L, optical isomers, furanose and pyranose, α and β anomers, epimers); Reducing and non – reducing sugars. Physiological importance of Monosaccharides, Disaccharides, Polysaccharides</p> | S. Hansda | 9 |
| <p>Unit 2: Proteins Amino acids: Structure, Classification, General and Electro chemical properties of α-amino acids; Essential and non-essential amino acids; Structures of Protein: Primary, secondary, tertiary and quaternary) of protein, Classification of proteins.</p> | A. Ray | 9 |
| <p>Unit 3: Lipids Classification of lipids; Saturated and unsaturated fatty acids, essential and non – essential fatty acids. Structure and formation of Triglyceride.; Iodine number and saponification number of fats.</p> | P. Bhowmick | 4 |
| <p>Unit 4: Enzymes Nomenclature, classification and properties; Cofactors and coenzymes, Effect of Temperature, pH, substrate concentration, enzyme concentration on enzyme action, Isozymes and Proenzyme, Mechanism of enzyme action (Lock and key model, Induced fit model). Enzyme kinetics: Derivation of Michaelis-Menten equation with its significance, Lineweaver-Burk plot and its significance. Enzyme inhibition – competitive, non- competitive, allosteric / feedback and its effect on V_{max} and K_m.</p> | S. Sarkar | 9 |

| | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|
| <p>Unit 5: Carbohydrates Metabolism Glycolysis, Citric acid cycle, Pentose phosphate pathway, Gluconeogenesis from lactate and glycerate, Glycogenesis and Glycogenolysis. (Pathways with name of enzymes and significance)</p> <p>Unit 6: Protein Metabolism Transamination, Deamination and its types (Pathways with name of enzymes and significance) Fate of Cskelton of Glucogenic and Ketogenic amino acids.</p> <p>Unit 7: Lipid Metabolism β-oxidation of fatty acids – a. Palmitic acid {saturated (C 16:0)}, b. Linoleic acid {unsaturated (C 18:2)} Fatty acid biosynthesis</p> <p>Unit 8: Nucleic acid Metabolism Degradation of purine; Purine Salvage pathway and significance</p> <p>Unit 7: Free radicals and Antioxidants Concepts of free radicals and antioxidants with examples.</p> | <p>S. Hansda</p> <p>A. Ray</p> <p>P. Bhowmick</p> <p>P. Bhowmick</p> <p>S. Biswas</p> | <p>7</p> <p>4</p> <p>4</p> <p>3</p> <p>1</p> |
| SEC-2 Aquaculture Major; SEC-2 | | |
| 3 Credits | 50 Hours | |
| Full Marks 75 | | |
| Second Semester: January- June | | |
| Topic | Name of the Teacher | No. of Hours |
| <p>Unit 1: Basics of Idea of Fish Biology Qualities of Cultivable fish, Indigenous and Exotic</p> <p>Unit 2: Sustainable Aquaculture System Sustainable Aquaculture Culture System: Extensive, Semi intensive, Extensive Water quality in culture ponds and factors controlling water quality. Preparation and Management of Fish Culture Ponds in Composite Fish Culture Cage Culture, Pen Culture, Raceways. Flow through system. Biofloc. Cold water fishery. Jeol Fishery. Sewage fed fishery. Mariculture with special emphasis on sea weed culture.(Basic concept) Induced Breeding of Carps. Synthetic</p> | <p>S. Biswas</p> <p>S. Biswas</p> | <p>3</p> <p>17</p> |

| PART II: SEMESTER 3 (under CBCS) | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| CORE COURSE 5 : Chordata | | |
| ZOOA-CC3-5-TH | | |
| 4 Credits | 50 Hours | |
| Third Semester : July- December | | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1: Introduction to Chordates General characteristics and outline classification of Phylum Chordata (Young, 1981) | A. Ray | 2 |
| Unit 2: Protochordata General characteristics and classification of sub-phylum Urochordata and Cephalochordata up to Classes (Young, 1981). Metamorphosis in <i>Ascidia</i> . Chordate Features, structure of pharynx and feeding in <i>Branchiostoma</i> | A. Ray | 7 |
| Unit 3: Agnatha General characteristics and classification of cyclostomes up to order (Young, 1981) | S. Sarkar | 2 |
| Unit 4: Pisces General characteristics and classification up to living sub classes (Young, 1981); Accessory respiratory organ, Migration in fishes; Parental care in fishes; Swim bladder in fishes. | S. Hansda | 7 |
| Unit 5: Amphibia General characteristics and classification up to living Orders (Young, 1981); Metamorphosis, Paedomorphosis, Parental care in Amphibia. | S. Sarkar | 7 |
| Unit 6: Reptilia General characteristics and classification up to living Orders (Young, 1981); Poison apparatus and Biting mechanism in Snake. Poisonous & Non-Poisonous snake. | S. Sarkar | 8 |
| Unit 7: Aves General characteristics and classification up to living Sub-Classes (Young, 1981); Exoskeleton and migration in Birds; Principles and aerodynamics of flight | S. Hansda | 8 |

| | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|---------------------|
| Unit 8: Mammals General characters and classification up to living sub classes (Young, 1981); Exoskeleton derivatives of mammals; Adaptive radiation in mammals with reference to locomotory appendages; Echolocation in Micro chiropterans. | A. Ray | 9 |
| CORE COURSE 6: Animal Physiology:Controlling and Co-ordinating System | | |
| ZOOA-CC3-6-TH | | |
| 4 Credits | 50 Hours | |
| Third Semester: July- December | | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1: Tissues Structure, location, classification and functions of epithelial tissue, connective tissue, muscular tissue and nervous tissue | R. Das | 4 |
| Unit 2: Bone and Cartilage Structure and types of bones and cartilages, Ossification | R. Das | 4 |
| Unit 3: Nervous System Structure of neuron, resting membrane potential, Origin of action potential and its propagation across the myelinated and non-myelinated nerve fibres: Types of synapse, Synaptic transmission and Neuromuscular junction | P.Bhowmic | 10 |
| Unit 4: Muscular system Histology of different types of muscle; Ultra-structure of skeletal muscle; Molecular and chemical basis of muscle contraction; Characteristics of muscle fibre | S. Hansda | 10 |
| Unit 5: Reproductive System Histology of mammalian testis and ovary; physiology of mammalian reproduction- menstrual and estrous cycle | S. Biswas | 6 |
| Unit 6: Endocrine System Histology and function of thyroid, pancreas and adrenal. Function of pituitary ;Classification of hormones; Mechanism of Hormone action; Signal transduction pathways for Steroidal and Non-steroidal hormones; Hypothalamus (neuroendocrine gland) - principal nuclei involved in neuroendocrine control of anterior pituitary; Placentalhormones. | S. Biswas S. Sarkar | 16 |

CORE COURSE 7: Fundamentals of Biochemistry**ZOOA-CC3-7-TH****4 Credits****50 Hours****Third Semester: July- December**

| Topic | Name of the Teacher | No. of Hours |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| Unit 1: Carbohydrates Structure and Biological importance: Monosaccharides, Disaccharides, Polysaccharides; Derivatives of Monosaccharides; Carbohydrate metabolism: Glycolysis, Citric acid cycle, Pentose phosphate pathway, Gluconeogenesis | S. Hansda | 8 |
| Unit 2: Lipids Structure and Significance: Physiologically important saturated and unsaturated fatty acids, Triacylglycerols, Phospholipids, Sphingolipid, Glycolipids, Steroids, Eicosanoids and terpenoids. Lipid metabolism: β -oxidation of fatty acids - a. Palmitic acid {saturated (C 16:0)}, b. Linoleic acid {unsaturated (C 18:2)}; Fatty acid biosynthesis | P. Bhowmick | 7 |
| Unit 3: Proteins Amino acids: Structure, Classification, General and Electro chemical properties of α -amino acids; Physiological importance of essential and non-essential amino acids, Proteins Bonds stabilizing protein structure; Levels of organization; Protein metabolism: Transamination, Deamination, Urea cycle, Fate of C-skeleton of Glucogenic and Ketogenic amino acids | A. Ray | 10 |
| Unit 4: Nucleic Acids Structure of Purines, Pyrimidines, Nucleosides and Nucleotides; Nucleic Acid Metabolism: Catabolism of adenosine, Guanosine, cytosine and thymine. | P. Bhowmick | 10 |
| Unit 5: Enzymes Nomenclature and classification; Cofactors; Specificity of enzyme action; Isozymes; Mechanism of enzyme action; Enzyme kinetics; Derivation of Michaelis-Menten equation, Lineweaver-Burk plot; Factors affecting rate of enzyme-catalyzed reactions; Enzyme | S. Sarkar | 13 |

| | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| inhibition. | | |
| Unit 6: Oxidative Phosphorylation Redox systems; Mitochondrial respiratory chain, Inhibitors and un-couplers of Electron Transport System | S. Biswas | 2 |
| PART II: SEMESTER 4 (under CBCS) | | |
| CORE COURSE 8. Comparative Anatomy of Vertebrates | | |
| ZOOA-CC4-8-TH | | |
| 4 Credits | 50 Hours | |
| Fourth Semester: January - June | | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1: Integumentary System Structure, function and derivatives of integument in amphibian, birds and mammals | S. Sarkar | 10 |
| Unit 2: Digestive System Comparative anatomy of stomach; dentition in mammals | S. Sarkar | 6 |
| Unit 3: Respiratory System Respiratory organs in fish, birds and mammals | S. Hansda | 6 |
| Unit 4: Circulatory System General plan of circulation, Comparative account of heart and aortic arches | S. Hansda | 7 |
| Unit 5: Urinogenital System Succession of kidney in different vertebrate groups; evolution of urino-genital ducts | S. Hansda | 5 |
| Unit 6: Nervous system and sense organs Comparative account of brain in vertebrates; cranial nerves; olfactory and auditory receptors in Vertebrates | A. Ray | 8 |
| Unit 7: Skeletal system Overview of axial and appendicular skeleton – limbs, girdles of pigeon; jaw suspension in mammals. | A. Ray | 8 |

| CORE COURSE 9: Animal Physiology: Life Sustaining Systems | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| ZOOA-CC4-9-TH | | |
| 4 Credits | | 50 Hours |
| Fourth Semester: January- June | | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1: Physiology of Digestion Structural organisation and function of gastro-intestinal tract; Mechanical and chemical digestion of food, absorption of Carbohydrates, Lipids and Proteins in Human | R. Das | 10 |
| Unit 2: Physiology of Respiration Mechanism of Respiration, Respiratory volumes and capacities, transport of Oxygen and Carbon dioxide in blood, Dissociation curves and the factors influencing it, respiratory pigments; Carbon monoxide poisoning | S. Sarkar | 10 |
| Unit 3: Physiology of Circulation Structure and functions of haemoglobin; Blood clotting system; Haematopoiesis; Basic steps and its regulation; Blood groups; ABO and Rh factor | S. Sarkar | 8 |
| Unit 4: Physiology of Heart Coronary Circulation, Structure and working of conducting myocardial fibres, Origin and conduction of cardiac impulses; Cardiac Cycle and cardiac output | S. Hansda | 8 |
| Unit 5: Thermoregulation & Osmoregulation Thermal regulation in camel and polar bear, Osmoregulation in aquatic vertebrates | S. Hansda | 6 |
| Unit 6: Renal Physiology Structure of Kidney and its functional unit, Mechanism of urine formation, Regulation of acid-base balance | S. Hansda | 8 |
| CORE COURSE 10: Immunology | | |
| ZOOA-CC4-10-TH | | |
| 4 Credits | | 50 Hours |
| Fourth Semester: January - June | | |

| Topic | Name of the Teacher | No. of Hours |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|--------------|
| Unit 1: Overview of Immune System Introduction – concept of health and disease; Cells and organs of the Immune system | R. Das | 3 |
| Unit 2: Innate and Adaptive Immunity Anatomical barriers, Inflammation, Cell and molecules involved in innate immunity, Adaptive immunity (Cell mediated and humoral). | R. Das | 9 |
| Unit 3: Antigens Antigenicity and immunogenicity, Immunogens, Adjuvants and haptens, Factors influencing immunogenicity, B and T-Cell epitopes | P. Bhowmick | 6 |
| Unit 4: Immunoglobulins Structure and functions of different classes of immunoglobulins, Antigen-antibody interactions, Immunoassays (ELISA and RIA), Monoclonal antibody production | A. Ray | 10 |
| Unit 5: Major Histocompatibility Complex Structure and functions of MHC molecules. Structure of T cell Receptor and its signalling, T cell development & selection | A. Ray | 6 |
| Unit 6: Cytokines Types, properties and functions of cytokines | P. Bhowmick | 3 |
| Unit 7: Complement System Components and pathways of complement activation. | P. Bhowmick | 5 |
| Unit 8: Hypersensitivity Gell and Coombs' classification and brief description of various types of hypersensitivities. | P. Bhowmick | 4 |
| Unit 9: Vaccines Various types of vaccines. Active & passive immunization (Artificial and natural). | R. Das | 4 |
| CORE COURSE 11: Ecology | | |
| ZOOA-CC5-11-TH | | |
| 4 Credits | 50 Hours | |
| Fifth Semester: July- December | | |

| Topic | Name of the Teacher | No. of Hours |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------|--------------------------------------------------|
| <p>Unit 1: Introduction to Ecology Autecology and synecology, Levels of organization, Laws of limiting factors, Study of Physical factors, The Biosphere.</p> <p>Unit 2: Population Unitary and Modular populations Unique and group attributes of population: Demographic factors, life tables, fecundity tables, survivorship curves, dispersal and dispersion. Geometric, exponential and logistic growth, equation and patterns, r and K strategies Population regulation - density- dependent and independent factors, Population Interactions, Gause's Principle with laboratory and field examples, Lotka-Volterra equation for competition.</p> | <p>P. Bhowmick</p> <p>S. Sarkar</p> | <p>4</p> <p>18</p> |
| <p>Unit 3: Community Community characteristics: species diversity, abundance, dominance, richness, Vertical stratification, Ecotone and edge effect; Ecological succession with one example.</p> <p>Unit 4: Ecosystem Types of ecosystem with an example in detail, Food chain: Detritus and grazing food chains, Linear and Y-shaped food chains, Food web, Energy flow, Ecological pyramids and Ecological efficiencies; Nitrogen cycle.</p> <p>Unit 5: Applied Ecology Types & level of biodiversity Mega-diversity countries, Biodiversity Hot spot, Flagship species, Keystone species, Wildlife Conservation (in situ and ex situ conservation), concept of protected areas. Red data book, Indian wild life act & Schedule. Concept of corridor, advantages and problem of corridor. Threats to survival and conservation strategies for Tiger, Olive ridley, White Rumped Vulture.</p> | <p>S. Biswas</p> <p>A. Ray</p> <p>S. Hansda</p> | <p>10</p> <p>7</p> <p>6</p> |
| CORE COURSE 12.Principle of Genetics | | |
| ZOOA-CC5-12-TH | | |
| 4 Credits | 50 Hours | |
| Fifth Semester: July- December | | |

| Topic | Name of the Teacher | No. of Hours |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|--------------|
| <p>Unit 1: Mendelian Genetics and its Extension Principles of inheritance, Incomplete dominance and co-dominance, Epistasis, Multiple alleles, Isoallele (White eye mutations), Pseudoallele (Lozenge Locus) & Cis-trans test for allelism, Lethal alleles, Pleiotropy, Penetrance & Expressivity</p> | S. Biswas | 12 |
| <p>Unit 2: Linkage, Crossing Over and Linkage Mapping Linkage and Crossing, Complete & Incomplete Linkage, Measuring Recombination frequency and linkage map construction using three factor crosses, Interference and coincidence Sex linkage in <i>Drosophila</i> (White eye locus) & Human (Haemophilia).</p> | S. Biswas | 8 |
| <p>Unit 3: Mutations Types of gene mutations (Classification), Types of chromosomal aberrations (Classification with one suitable example from <i>Drosophila</i> and Human of each), variation in chromosome number; Non-disjunction of X chromosome in <i>Drosophila</i>; Non-disjunction of Human Chromosome 21. Molecular basis of mutations in relation to UV light and chemical</p> | P. Bhowmick | 12 |

| | | | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|--|-----------|---|
| <p>mutagens. Mutation detection in <i>Drosophila</i> by attached X method. Biochemical mutation detection in <i>Neurospora</i>.</p> | } | | | |
| <p>Unit 4: Sex Determination Mechanisms of sex determination in <i>Drosophila</i> and in man; Dosage compensation in <i>Drosophila</i> & Human</p> | | | S. Sarkar | 8 |
| <p>Unit 5: Extra-chromosomal Inheritance Kappa particle in <i>Paramoecium</i>, Shell spiralling in snail</p> | | | A. Ray | 2 |
| <p>Unit 6: Genetic Fine Structure Complementation test in Bacteriophage (Benzer's experiment on RII locus)</p> | | | A. Ray | 2 |
| <p>Unit 7: Transposable Genetic Elements IS element in bacteria, Ac-Ds elements in maize and P elements in <i>Drosophila</i>, LINE, SINE, Alu elements in humans</p> | | | S. Hansda | 6 |

| CORE COURSE 13: Developmental Biology | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| ZOOA-CC6-13-TH | | |
| 4 Credits | 50 Hours | |
| Sixth Semester: January - June | | |
| Topic | Name of the Teacher | No. of Hours |
| <p>Unit 1: Early Embryonic Development Gametogenesis: Spermatogenesis, Oogenesis (sea urchin & mammal); Types of eggs, Egg membranes; Fertilization in sea urchin and mammal; Planes and patterns of cleavage; Types of Blastula [frog and chick]; Fate map in chick embryo, fate mapping using vital dye and radioactive technique; Gastrulation in frog and chick; Embryonic induction and organizers in <i>Xenopus</i> (Spemann & Mangold's experiment)</p> | S. Sarkar | 19 |
| <p>Unit 2: Late Embryonic Development Extra-embryonic membranes in Chick; Implantation of embryo in humans, Placenta (Structure, types and functions of placenta)</p> | S. Hansda | 10 |
| <p>Unit 3: Post Embryonic Development Development of brain and Eye in Chick. Molecular Induction in Brain and Eye development.</p> | A. Ray | 8 |
| <p>Unit 4: Implications of Developmental Biology <i>In vitro</i> fertilization (IVF), Stem cell: Concept of potency, types, markers and applications of stem cell therapy in bone marrow transplantation and cartilage regeneration</p> | P. Bhowmick | 11 |

| CORE COURSE 14.Evolutionary Biology | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| ZOOA-CC6-14-TH | | |
| 4 Credits | 50 Hours | |
| Sixth Semester: January - June | | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1 Origin of Life (Chemical basis), RNA world hypothesis | P. Bhowmick | 5 |
| Unit 2 Historical review of Evolutionary concepts: Lamarkism, Darwinism and Neo Darwinism | S. Biswas | 5 |
| Unit 3 Geological time scale, Fossil: types and age determination by Carbon dating, Evolution of horse | A. Ray | 6 |
| Unit 4 Natural Selection: Modes with Examples | S. Sarkar | 6 |
| Unit 5 Species concept, Isolating mechanisms, modes of speciation; Speciation by chromosome rearrangement in <i>Drosophila</i> . Adaptive radiation/macroevolution (exemplified by Galapagosfinches). | S. Sarkar | 9 |
| Unit 6 Origin and Evolution of Man, Unique Hominid characteristics contrasted with primate characteristic | S. Biswas | 2 |
| Unit 7 Population genetics: Hardy-Weinberg Law; factors disrupting H-W equilibrium (Genetic Drift, Migration and Mutation and Selection in changing allele frequencies (only derivations required).Simple problems related to estimation of allelic and gene frequencies. | S. Biswas | 9 |
| Unit 8 Extinction, back ground and mass extinctions, detailed example of K-T extinction | A. Ray | 3 |
| Unit 9 Phylogenetic trees, construction and interpretation of Phylogenetic tree using parsimony, convergent and divergent evolution. | S. Biswas | 5 |

| PART II: SEMESTER 3 (under CBCS) | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|-------------------------|
| SEC-1 Apiculture ZOOA-SEC(A)-3-1-TH | | |
| Third Semester: July- December | | |
| Full Marks 80 | 2 Credits | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1: Biology of Bees <i>Apis</i> and Non- <i>Apis</i> Bee species and their identification. General Morphology of <i>Apis</i> Honey Bees Social Organization of Bee Colony | S. Sarkar | 2 |
| Unit 2: Rearing of Bees Artificial Bee rearing (Apiary), Beehives – Newton and Langstroth box Bee Pasturage Selection of Bee Species for Apiculture Modern Bee Keeping Equipment Methods of Extraction of Honey (Indigenous and Modern) | S. Hansda | 14 |
| Unit 3: Diseases and Enemies Bee Diseases and Enemies Control and Preventive measures | S. Sarkar | 6 |
| Unit 4: Bee Economy Products of Apiculture Industry and its Uses – Honey, Bees Wax, Propolis, Pollen etc. | S. Sarkar | 2 |
| Unit 5: Entrepreneurship in Apiculture Bee Keeping Industry – Recent Efforts, Modern Methods in employing artificial Beehives for cross pollination in horticultural gardens | S. Hansda | 6 |

**PART II: SEMESTER 4
(under CBCS)**

**SEC-1.Aquarium Fish Keeping
ZOOA-SEC(B)-4-1-TH**

Fourth Semester: January - June

Full Marks 80

2 Credits

| Topic | Name of the Teacher | No. of Hours |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| Unit 1: Introduction to Aquarium Fish Keeping The potential scope of Aquarium Fish Industry as a Cottage Industry, Exotic and Endemic species of Aquarium Fishes | R. Das | 2 |
| Unit 2: Biology of Aquarium Fishes Common characters and sexual dimorphism of Fresh water and Marine Aquarium fishes such as Guppy, Molly, Sword tail, Gold fish, Angel fish, Blue morph, Anemone fish and Butterfly fish | R. Das | 10 |
| Unit 3: Food and feeding of Aquarium fishes Use of live fish feed organisms. Preparation and composition of formulated fish feeds, Aquarium fish as larval predator | S. Biswas | 8 |
| Unit 4: Fish Transportation Live fish transport - Fish handling, packing and forwarding techniques. | S. Biswas | 5 |
| Unit 5: Maintenance of Aquarium General Aquarium maintenance – budget for setting up an Aquarium Fish Farm as a Cottage Industry | R. Das | 5 |

**PART III: SEMESTER 5
(under CBCS)**

**DSE1. Parasitology
ZOOA-DSE(A)-5-1- TH**

Fifth Semester: July- December

**4
Credits**

**50
Hours**

| Topic | Name of the Teacher | No. of Hours |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| <p>Unit 1: Introduction to Parasitology Brief introduction of Parasitism, Parasite, Parasitoid and Vectors (mechanical and biological vector); Host parasite relationship</p> | S. Biswas | 2 |
| <p>Unit 2: Parasitic Protists Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of <i>Giardia intestinalis</i>, <i>Trypanosoma gambiense</i>, <i>Leishmania donovani</i></p> | R.Das | 12 |
| <p>Unit 3: Parasitic Platyhelminthes Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of <i>Schistosoma haematobium</i>, <i>Taenia solium</i></p> | S. Sarkar | 12 |
| <p>Unit 4: Parasitic Nematodes Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of <i>Ascaris lumbricoides</i>, <i>Ancylostoma duodenale</i>, <i>Wuchereria bancrofti</i>, Nematode plant interaction.</p> | A. Ray | 12 |
| <p>Unit 5: Parasitic Arthropods Biology, importance and control of ticks: Soft tick (<i>Ornithodoros</i>), Hard tick (<i>Ixodes</i>), mites (<i>Sarcoptes</i>), Lice (<i>Pediculus</i>), Flea (<i>Xenopsylla</i>) and Bug (<i>Cimex</i>). Parasitoid.</p> | R. Das | 10 |
| <p>Unit 6: Parasite Vertebrates Cookicutter Shark, Hood Mocking bird, Vampire bats their parasiticbehaviour and effect on host.</p> | S. Biswas | 2 |

**PART III: SEMESTER 5
(under CBCS)**

**DSE1. Endocrinology
ZOOA-DSE(B)-5-1-TH**

Fifth Semester: July- December

**4
Credits**

**50
Hours**

| Topic | Name of the Teacher | No. of Hours |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|---------------------------------|
| <p>Unit 1: Introduction to Endocrinology General idea of Endocrine systems, Classification, Characteristic and Transport of Hormones, Neuro-secretions and Neuro-hormones: Examples and Functions</p> | <p align="center">S. Sarkar</p> | <p align="center">6</p> |
| <p>Unit 2: Hypothalamo-Hypophyseal Axis Structure and functions of hypothalamus and Hypothalamic nuclei, Regulation of neuroendocrine glands, Feedback mechanisms, Hypothalamo-Hypophyseal-Gonadal Axis. Structure of pituitary gland, Hormones and their functions, Hypothalamo-hypophyseal portal system</p> | <p align="center">A. Ray</p> | <p align="center">12</p> |
| <p>Unit 3: Peripheral Endocrine Glands Structure, Hormones and Functions of Thyroid gland, Parathyroid, Adrenal, Pancreas, Ovary and Testis. Disorders of endocrine glands (<i>Diabetes mellitus</i> type I & Type II; Graves' Disease).</p> | <p align="center">A. Ray</p> | <p align="center">12</p> |
| <p>Unit 4: Regulation of Hormone Action Mechanism of action of steroidal, non-steroidal hormones with receptors (cAMP, IP3-DAG), Calcium and Glucose homeostasis in mammals. Bioassays of hormones using RIA & ELISA, Estrous cycle in rat and menstrual cycle in human.</p> | <p align="center">S. Hansda</p> | <p align="center">12</p> |
| <p>Unit 5. Non Mammalian Vertebrate Hormone Functions of Prolactin in Fishes, Amphibia & Birds Function of Melanotropin in Teleost fishes, Amphibians and Reptiles.</p> | <p align="center">S. Hansda</p> | <p align="center">8</p> |

| PART III: SEMESTER 6 (under CBCS) | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|---------------------|
| DSE2. Animal Biotechnology ZOOA-DSE(A)-6-2-TH | | |
| Sixth Semester: January - June | | |
| 4 Credits | 50 Hours | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1: Introduction Organization of <i>E.coli</i> and <i>Drosophila</i> genome. | P. Bhowmick | 5 |
| Unit 2: Molecular Techniques in Gene manipulation Recombinant DNA technology, Restriction endonucleases. Cloning Vectors & their features: Plasmids, Phage vectors, Cosmids, Phagemids, BAC, YAC, and HAC. Shuttle and Expression Vectors. Construction of Genomic libraries and cDNA libraries Transformation techniques: Cloning in bacteria and detection technique of clone Agarose and Polyacrylamide Gel Electrophoresis, Southern, Northern and Western blotting, Polymerase chain reaction: Allele specific, RAPD & RT PCR, DNA Fingerprinting | P. Bhowmick | 11 |
| Unit 3: Genetically Modified Organisms Production of cloned and transgenic animals: Nuclear Transplantation, Retroviral Method, DNA microinjection. Applications of transgenic animals: Production of pharmaceuticals, production of donor organs, knock-out mice. | A. Ray | 12 |
| Unit 4: Culture Techniques and Applications Animal cell culture, Expressing cloned genes in mammalian cells, Molecular diagnosis of genetic diseases (Cystic fibrosis, Sickle cell anaemia, Thalassemia). Dolly & Polly cloning Genetically modified economically important animal Gene Therapy | S. Biswas | 12 |
| | S. Sarkar | 10 |

| PART III: SEMESTER 6 (under CBCS) | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|---------------------|
| DSE2. Fish and Fisheries ZOOA-DSE(B)-6-2-TH | | |
| Sixth Semester: January - June | | |
| 4 Credits | 50 Hours | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1: Introduction and Classification Feeding habit, habitat and manner of reproduction. Classification of fish (upto Subclasses) (Romar, 1959) | R.Das | 4 |
| Unit 2: Morphology and Physiology Types of fins and their modifications; Locomotion in fish; Hydrodynamics; Types of Scales, Use of scales in Classification and determination of age of fish; Gills and gas exchange; Swim Bladder: Types and role in Respiration, buoyancy; Electric organ, Bioluminescence | R.Das | 14 |
| Unit 3: Fisheries Inland Fisheries; Marine Fisheries; Fishing crafts and Gears; Depletion of fisheries resources; Application of remote sensing and GIS in fisheries; Fisheries law and regulations | S.Hansda | 10 |
| Unit 4: Aquaculture Extensive, semi-intensive and intensive culture of fish; Pen and cage culture, polyculture, composite fish culture, brood stock management, induced breeding of fish, management of finfish hatcheries, Preparation and maintenance of fish aquarium; Preparation of compound diets for fish, Role of water quality in aquaculture; Fish diseases: Bacterial, viral and parasitic; Preservation and processing of harvested fish, Fishery by-products | R.Das | 16 |
| Unit 5: Fish in research Transgenic fish Zebra fish as a model organism in research. | S.Hansda | 6 |

| | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| Course: B.Sc. (General) Zoology | | |
| PART II SEMESTER 3 (under CBCS) | | |
| CORE COURSE 3. PHYSIOLOGY AND BIOCHEMISTRY | | |
| ZOOG-CC3-3-TH | | |
| Third Semester : July - December | | |
| Full Marks 50 | 4 Credits | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1: Nerve and muscle Structure of a neuron, resting membrane potential, Origin of Action potential and its propagation in myelinated and non-myelinated nerve fibres, Ultra-structure of skeletal muscle, Molecular and chemical basis of muscle contraction | S. Hansda | 8 |
| Unit 2: Digestion Physiology of digestion in the alimentary canal; Absorption of carbohydrates, proteins, lipids | R. Das | 6 |
| Unit 3: Respiration Pulmonary ventilation, Transport of Oxygen and carbon | R. Das | 6 |
| Unit 4: Cardio-vascular system Composition of blood, Structure of Heart, Origin and conduction of the cardiac impulse, cardiac cycle | S. Sarkar | 6 |
| Unit 5: Excretion Structure of nephron, Mechanism of Urine formation; Counter-current Mechanism | R. Das | 6 |
| Unit 6: Reproduction and Endocrine Glands Physiology of male reproduction: Histology of testis, hormonal control of spermatogenesis; Physiology of female, reproduction: Histology of ovary, hormonal control of menstrual cycle. Structure and function of pituitary, thyroid, pancreas and adrenal. | S. Sarkar | 10 |
| Unit 7: Carbohydrate Metabolism | | |

| | | |
|----------------------------------------------------------------------------------------------------------------------------------|--------|---|
| Glycolysis, Krebs's cycle, Glycogenesis, Electron Transport Chain. | A. Ray | 4 |
| Unit 8: Lipid metabolism Beta oxidation of Palmitic acid {saturated (C 16:0)} and Linoleic acid {unsaturated (C 18:2)} | A. Ray | 4 |
| Unit 9: Protein Metabolism Transamination, Deamination, Urea cycle | A. Ray | 4 |
| Unit 10. Enzyme Enzyme Classification, factors affecting enzyme action, Inhibition. | A. Ray | 2 |

PART II: SEMESTER 4.

CORE-COURSE 4.Genetics & Evolutionary Biology

ZOOG-CC4-4-TH

Fourth Semester: January - June

Full Marks 50

4 Credits

| Topic | Name of the Teacher | No. of Hours |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|--------------|
| Unit 1:Mendelian Genetics and its Extension Principles of Inheritance, Chromosome theory of inheritance,Incomplete dominance and codominance, Multiple alleles, lethal alleles, sex linked inheritance in <i>Drosophila</i> (White eye locus) & Human (Thalassemia). | S. Biswas | 10 |
| Unit 2: Linkage, Crossing Over Linkage and crossing over, Complete & Incomplete Linkage, Recombination frequency as a measure of linkage intensity. Holiday Model | S. Biswas | 8 |
| Unit 3: Mutation Chromosomal mutation, Deletion, duplication, inversion, translocation,aneuploidy, gene mutation, induced mutation, types & example | P. Bhowmick | 8 |
| Unit 4: Sex determination Genic Balance theory and dosage compensation in <i>Drosophila</i> . | P. Bhowmick | 8 |
| Unit 5: Origin of Life Chemical Origin of life | P. Bhowmick | 2 |
| Unit 6: Evolutionary Theories Lamarckism, Darwinism, Neo-Darwinism. | S. Biswas | 6 |
| Unit 7: Process of Evolutionary changes | | |

| | | |
|----------------------------------------------------------------|------------------|----------|
| Isolating mechanism, Natural Selection. | S. Sarkar | 4 |
| Unit 8: Speciation Sympatric, Allopatric, Parapatric | S. Sarkar | 4 |

| Skill Enhancement Elective Courses (SEC) | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| SEMESTER –3 SEC-A | | |
| APICULTURE; ZOOG-SEC-A-3-1-TH | | |
| Third Semester : July - December | | |
| Full Marks 80 | 2 Credits | |
| Topic | Name of the Teacher | No. of Hours |
| Unit 1: Biology of Bees Classification and Biology of Honey Bees Social Organization of Bee Colony | S. Sarkar | 2 |
| Unit 2: Rearing of Bees Artificial Bee rearing; Apiary, Beehives - Newton and Langstroth, Bee Pasturage; Selection of Bee Species for Apiculture; Bee Keeping Equipment; Methods of Extraction of Honey; Indigenous and Modern | S. Hansda | 14 |
| Unit 3: Diseases and Enemies Bee Diseases and Enemies Control and Preventive measures | S. Sarkar | 6 |
| Unit 4: Bee Economy Products of Apiculture Industry and its Uses ;Honey, Bees Wax, Propolis, Pollen etc | S. Sarkar | 2 |
| Unit 5: Entrepreneurship in Apiculture Bee Keeping Industry - Recent Efforts, Modern Methods in employing artificial Beehives for cross | S. Hansda | 6 |

Discipline specific courses (DSE)

SEMESTER –5 DSE-A

Applied Zoology.ZOOG-DSE-A-5-1-TH

Fifth Semester : July - December

**Full Marks
50**

**Credits
4**

Topic

**Name of
the
Teacher**

**No. of
Hours**

Unit I: Host & Parasite Relationship

Type of Host, Types of Parasites, Other types of Relations.

S. Biswas

2

Unit 2: Epidemiology of Diseases

Transmission, Prevention and Control of Tuberculosis and Typhoid.

S. Biswas

5

Unit 3: Parasitic Protozoa

Life History and pathogenicity of *Entamoeba histolytica*, *Plasmodium vivax* and *Trypanosoma gambiense*.

A. Ray

7

Unit 4: Parasitic Helminthes

Life History and pathogenicity of *Alcylostoma duodenale*, *Wuchereria bancrofti*.

A. Ray

8

Unit 5: Insect of Economic Importance

Biology, Control and Damage caused by *Heliocoverpa armigera*, *Pyrilla perpusilla*, *Sytophilus oryzae* and *Tribolium casteneum*.

S. Biswas

8

Unit 6: Insect of Medical Importance

Medical Importance and control of *Anopheles*

S. Biswas

2

Unit 8: Animal Husbandry

Preservation and artificial insemination in cattle; Induction of early puberty and synchronization of estrus in cattle

R. Das

6

Unit 9: Poultry Farming

Principles of poultry breeding, Management of breeding stock and broilers, Processing and preservation of eggs

R. Das

6

Unit 10: Fish Technology

Genetic improvements in aquaculture industry; Induced breeding and transportation of fish seed

R. Das

6

**Skill Enhancement Elective Courses
(SEC)**

SEMESTER –6 SEC-B**Medical diagnosis; ZOOG-SEC-B-6-4-TH****Sixth Semester: January - June****Full Marks 80****2 Credits**

| Topic | Name of the Teacher | No. of Hours |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| Unit 1: Diagnostics Methods Used for Analysis of Blood Blood composition, Preparation of blood smear and Differential Leucocyte Count (D.L.C) using Leishman's stain, Platelet count using haemocytometer, Erythrocyte Sedimentation Rate (E.S.R) | S. Biswas | 8 |
| Unit 2: Diagnostic Methods Used for Urine Analysis Urine Analysis: Physical characteristics; Abnormal constituents, Urine culture | S. Biswas | 4 |
| Unit 3: Non-infectious Diseases Causes, types, symptoms, complications, diagnosis and prevention of Diabetes (Type I and Type II), Hypertension (Primary and secondary), Testing of blood glucose using Glucometer/Kit | S. Hansda | 6 |
| Unit 4: Infectious Diseases Causes, types, symptoms, diagnosis and prevention of Tuberculosis and Hepatitis, Malarial parasite (Microscope based and ELISA based) | A. Ray | 3 |
| Unit 5: Clinical Biochemistry Lipid profiling, Liver function test. PSA test | S. Sarkar | 1 |
| Unit 6: Clinical Microbiology Antibiotic Sensitivity Test | S. Sarkar | 1 |
| Unit 8: Tumours Types (Benign/Malignant), Detection and metastasis; Medical imaging: X-Ray of Bone fracture, | A. Ray | 2 |
| Unit 9: Visit to Pathological Laboratory and Submission of Project | A. Ray | 5 |
| Discipline specific courses (DSE) | | |

**SEC
BIOFERTILIZERS AND BIOPESTICIDES (THEORY)
BOT-H-SEC-2-TH**

Credits : 3

Total marks 75; Class 45 hours

Second Semester: January - June

| Topic | Name of the Teacher | No. of Lectures |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|------------------------|
| <p>1.1 General account and components of organic farming; microbes used as biofertilizers, general account on mass production of biofertilizers; 1.2 Manure- Green manuring and organic fertilizers; types and methods of composting; vermicompost and field applications; recycling of biodegradable municipal, agricultural and industrial wastes.</p> | <p>R.Bar</p> | <p>6</p> |
| <p>2. Nitrogen fixing bacteria as biofertilizers: 2.1 Rhizobium- Isolation, identification, mass multiplication, carrier-based inoculant formulation, field application; 2.2 Azospirillum-</p> | <p>R.Bar</p> | <p>9</p> |

| | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-----------|
| <p>Isolation, carrier-based inoculants, mass multiplication, associative effect of different microorganisms; 2.3 Azotobacter- Classification, characteristics, crop response to Azotobacter inoculants, maintenance and mass multiplication.</p> | <p>R.Bar</p> | |
| <p>3.1 Cyanobacteria (Blue green algae), Azolla and Anabaena azollae association, nitrogen fixation, factors affecting growth, blue green algae and Azolla in rice cultivation. 3.2 Actinorhizal symbiosis- Actinorhizal plants, infection process, isolation of Frankia.</p> | <p>R.Bar</p> | <p>6</p> |
| <p>4. Mycorrhizal association- 4.1 Types of mycorrhizal association, phosphorus nutrition, growth and yield; 4.2 colonization of VAM – isolation and inoculum production of VAM and its influence on growth and yield of crop plants.</p> | <p>M. Karmakar</p> | <p>6</p> |
| <p>5.1 Phosphate, Potash and Zinc Solubilizing Microbes- Isolation, characterization, mass production, field application; 5.2 Plant Growth Promoting Rhizobacteria (PGPR) as biofertilizers, mode of action of PGPR.</p> | <p>M. Karmakar</p> | <p>6</p> |
| <p>6. Biopesticides – 6.1 Introduction; General features of potential biopesticides; Prospect and limitation; 6.2 Trichoderma: Isolation, mass production, formulation, quality control and field application; 6.3 Pseudomonas- Isolation, beneficial Pseudomonas strains in agriculture, mode of action; 6.4 Fungi as bioinsecticide- Metarhizium anisopliae, Beauveria bassiana and Verticillium lecanii- overview, mode of action and use in agriculture; 6.5 Nematophagous fungi-overview, mode of action; 6.6 Bacteria as bioinsecticide- Bacillus thuringiensis - Characterization, mass production and field application; 6.7 Virus as bioinsecticide- Baculovirus- characterization, bioformulation, mass production and field application.</p> | <p>M. Karmakar</p> | <p>12</p> |

| Credit 1 | | |
| Total marks 25; Class 30 hours | | |
| Second Semester: January - June | | |
| Topic | Name of the Teacher | No. of Lectures |
| 1. Preparation of selective media for isolation of Azotobacter, phosphate- solubilizing microbes and Trichoderma. | R. Bar | 10 |
| 2. Isolation and identification of phosphate-solubilizing fungi. | S. Sengupta | |
| 3. Study of Arbuscular Mycorrhizal fungi. | S. Sengupta | |
| 4. Isolation of Azotobacter and Trichoderma from the soil. | M. Karmakar | |
| 5. Evaluation of in vitro antagonistic activity of Trichoderma species in the dual culture system. | M. Karmakar | |

| Third Semester: July- December | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|------------------------|
| CORE COURSE 5. Paleobotany and palynology | | |
| BOTA-CC3-5-TH | | |
| 4 Credits | | |
| Full Marks 50 | | |
| Topic | Name of the Teacher | No. of Lectures |
| 1. Geological time scale with dominant plant groups through ages. | T. Biswas | 4 |
| 2. Plant Fossil: 2.1 Types: Body fossil (Micro- and Megafossils), Trace fossil, Chemical fossil, Index fossil, 2.2. Different modes of preservation (Schopf, 1975), 2.3. Conditions favouring fossilization, 2.4. Nomenclature and Reconstruction, 2.5. Principle of fossil dating (a brief idea), 2.6. Importance of fossil study. | P. Chatterjee | 12 |
| 3. Fossil Pteridophytes: Structural features, Geological distribution and Evolutionary significance of 3.1. <i>Rhynia</i> , 3.2. <i>Lepidodendron</i> (Reconstructed), 3.3. <i>Calamites</i> (Reconstructed). | P. Chatterjee | 10 |
| 4. Fossil gymnosperms: Structural features and Geological distribution of reconstructed genera: 4.1. <i>Lyginopteris</i> , 4.2. | T. Biswas | 10 |

| | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|----|
| <i>Williamsonia</i> , 4.3. <i>Cordaite</i> s. | T. Biswas | 6 |
| 5. Indian Gondwana System - Three fold division with major megafossil assemblages. | P. Chatterjee | 10 |
| 6. Palynology: 6.1 Spore and Pollen, 6.2. Pollen aperture types, 6.3. NPC classification (Erdtman). 6.4. Pollen wall- Sporopollenin, Stratification and Ornamentation (sculpturing). | P. Chatterjee | 8 |
| 7. Applied Palynology: Basic concepts of: 7.1. Palaeopalynology, 7.2. Aeropalynology, 7.3. Forensic palynology, 7.4. Melissopalynology. | | |

Paleobotany and palynology (Practical)

BOTA-CC3-5-P

2 Credits

Full Marks 30

Third Semester: July- December

| Topic | Name of the Teacher | No. of Lectures |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|-----------------|
| PALAEOBOTANY AND PALYNOLOGY | | |
| 1. Morphological study: <i>Ptilophyllum</i> and <i>Glossopteris</i> leaf fossils. | M. Karmakar | |
| 2. Study from permanent slides: T.S. of stem of <i>Rhynia</i> , <i>Lepidodendron</i> , <i>Calamites</i> , <i>Lyginopteris</i> , <i>Cordaite</i> s. | M. Karmakar | |
| 3. Study of Pollen types (colpate, porate and colporate) from permanent slides. Slides may be prepared from specimens: Colpate (<i>Leonurus sibiricus</i> / <i>Brassica</i> sp.), Porate (<i>Hibiscus rosa-sinensis</i>), Colporate (<i>Cassia sophera</i> / <i>C. tora</i>). | M. Karmakar | |

CORE COURSE 6: Reproductive biology of Angiosperms

BOTA-CC3-6-TH

4 Credits

Full Marks 50

Third Semester: July- December

| Topic | Name of the Teacher | No. of Lectures |
|---------------------------------------------------------------------------------------------|---------------------|-----------------|
| MORPHOLOGY OF ANGIOSPERMS | | |
| 1. Inflorescence types with examples. | T. Biswas | 8 |
| 2. Flower, induction of flowering, flower development-genetic and molecular aspects. | T. Biswas | 14 |
| 3. Fruits and seeds - types with examples. | T. Biswas | 8 |
| EMBRYOLOGY | | |
| 1. Pre-fertilization changes: | | |

| | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|------------------------|
| 1.1. Microsporogenesis and Microgametogenesis, 1.2. Megasporogenesis and Megagametogenesis (monosporic, bisporic and tetrasporic). | P. Saha | 6 |
| 2. Fertilization: 2.1. Pollen germination, 2.2. Pollen tube- growth, entry into ovule and discharge, 2.3. Double fertilization. | P. Saha | 6 |
| 3. Post-fertilization changes: 3.1. Embryogenesis in Capsella, 3.2. Development of Endosperm (3 types). | P. Saha | 10 |
| 4. Apomixis & Polyembryony: 4.1. Apomixis- Apospory and Apogamy, 4.2. Polyembryony- different types. | P. Saha | 8 |
| Reproductive biology of Angiosperms (Practical) | | |
| BOTA-CC3-6-P | | |
| 2 Credits | | |
| Full Marks 30 | | |
| Third Semester: July- December | | |
| Topic | Name of the Teacher | No. of Lectures |
| REPRODUCTIVE BIOLOGY OF ANGIOSPERMS | | |
| 1. Inflorescence types- study from fresh/ preserved specimens | P. Saha | |
| 2. Flowers- study of different types from fresh/ preserved specimens | P. Saha | |
| 3. Fruits- study from different types from fresh/preserved specimens | P. Saha | |
| 4. Study of ovules (permanent slides/ specimens/photographs)- types (anatropous, orthotropous, amphitropous and campylotropous) | P. Saha | |
| 5. Field study desirable | P. Saha | |
| 6. A project supported along with photographs taken during field study to be submitted giving comprehensive idea about different types of inflorescence, flowers and fruits. | P. Saha | |

| CORE COURSE 7: Plant Systematics | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|------------------------|

| Plant Systematics | Full Marks 50 | |
| Third Semester: July- December | | |
| Topic | Name of the Teacher | No. of Lectures |
| <p>TAXONOMY OF ANGIOSPERMS</p> <p>1 Introduction: 1.1. Components of Systematic: Nomenclature, Identification, Classification; 1.2. Taxonomy and its phases - Pioneer, Consolidation, Biosystematic and Encyclopaedic; alpha- and omega- taxonomy.</p> <p>2 Nomenclature: Type method, Publication, Rank of taxa, Rules of priority, Retention and rejection of names, Author Citation, Effective and valid publication, Elementary knowledge of ICN- Principles.</p> <p>3. Systems of classification: Broad outline of Bentham & Hooker (1862-1883), Cronquist (1988), Takhtajan (1991) - system of classification with merits and demerits. Brief reference of angiosperm phylogeny group (APG III) classification.</p> <p>3.1. Systematics in Practice: Herbaria and Botanical Gardens – their role in teaching and research; important Herbaria and Botanical Gardens of India and world (3 each); 3.2. Dichotomous keys – indented and bracketed.</p> <p>4. Phenetics and Cladistics: Brief idea on Phenetics, Numerical taxonomy- methods and significance; Cladistics- construction of dendrogram and primary analysis; Monophyletic, polyphyletic and paraphyletic groups; Plesiomorphy and apomorphy.8 lectures</p> <p>5. Data sources in Taxonomy: Supportive evidences from: 5.1. Phytochemistry, 5.2. Cytology, 5.3. Palynology and 5.4. Molecular biology data (Protein and Nucleic acid homology).8 lectures</p> <p>6. Diagnostic features, Systematic position (Bentham & Hooker and Cronquist), Economically important plants (parts used and uses) of the following</p> | S. Sengupta | 6 |
| | S. Sengupta | 6 |
| | M. Karmakar | 20 |

| Genetics | Full marks 50 | |
| Fourth Semester: January - June | | |
| Topic | Name of the Teacher | Number of Lectures |
| 1. Introduction: Mendelian genetics and its extension6 lectures | T. Biswas | 6 |
| 2. Linkage, Crossing over and Gene Mapping: 2.1.Complete and incomplete linkage (example), linked gene does not assort independently (example), linkage group, 2.2. Crossing over, crossing over produces recombination (example), detection of crossing over (McClintock's experiment), and 2.3.Molecular mechanism of crossing over (Holliday model), 2.4. Gene mapping with three point test cross, detection of middle gene in three point test cross, calculation of recombination frequencies, 2.5. Co-efficient of coincidence and 3. Classroom performance: (Lab records, permanent slides) 4. Field visit desirable to give an idea about cultivation of any crop (viz. rice, jute, mustard, tea, potato) 5. Field record of the visit, properly authenticated by escorting teacher interference, mapping function, 2.6. Problems on gene mapping, 2.7. Molecular mapping – ISH, FISH (brief idea). | T. Biswas | 16 |
| 3. Epistasis and Polygenic inheritance in plants. | T. Biswas | 4 |
| 4. Aneuploidy and Polyploidy: Types, examples, meiotic behaviour and importance of: 4.1. Aneuploidy, 4.2. Polyploidy, 4.3. Speciation and evolution through polyploidy. | P. Saha | 8 |
| 5. Chromosomal aberration: Types and meiotic behaviour of: 5.1. Deletion, 5.2. Duplication, 5.3. Translocation, and 5.4. Inversion. | P. Saha | 6 |
| 6. Mutation : 6.1. Point mutation-Transition, Transversion and Frame shift mutation, 6.2. Molecular mechanisms (tautomerisation, alkylation, deamination, base analogue incorporation, dimerisation), 6.3. DNA repair (brief idea). | P. Saha | 8 |
| 7. Structural organisation of Gene: | | |

| | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| 7.1. One Gene–one polypeptide concept, 7.2. Split gene, 7.3. Overlapping gene, 7.4. Repetitive DNA tandem and interspersed, 7.5. Transposon (Ac-Ds system), 7.6. Homoeotic gene in plants (ABCE Quartet model of flowering). | P. Saha | 12 |
| BOTA-CC4-10-P | | |
| 2 Credits | | |
| Genetics | | Full marks 30 |
| Topic | Name of the Teacher | Number of Lectures |
| <p>6. Introduction to chromosome preparation: Pre- treatment, Fixation, Staining, Squash and Smear preparation, Preparation of permanent slides.</p> <p>7. Determination of mitotic index and frequency of different mitotic stages in pre-fixed root tips of <i>Allium cepa</i>.</p> <p>8. Study of mitotic chromosome: Metaphase chromosome preparation, free hand drawing under high power objective, drawing with drawing prism under oil immersion lens, determination of 2n number, and comment on chromosome morphology of the following specimens from root tips: <i>Allium cepa</i>, <i>Aloe vera</i>, <i>Lens esculenta</i>.</p> <p>9. Study of chromosomal aberrations developed due to exposure to any two pollutants/ pesticides etc.</p> <p>10. Study of meiotic chromosome: Smear preparation of meiotic cells, identification of different stages and free hand drawing of the following specimens from flower buds: <i>Allium cepa</i> and <i>Setcreasea</i> sp.</p> <p>11. Identification from permanent slides: Meiosis – (i) normal stages (ii) abnormal stages – laggard, anaphase bridge, ring chromosome (<i>Rhoeo discolor</i>); Mitosis – (i) normal stages, (ii) abnormal stages early separation, late separation, multipolarity, sticky bridge, laggard, fragmentation, (ii) pollen mitosis.</p> | <p>P. | Topic | Name of the Teacher | Number of Lectures |
| <p>1. Introduction, nutritional and medicinal value of edible mushrooms; poisonous mushrooms, types of edible mushrooms available in India- <i>Volvariella volvacea</i>, <i>Pleurotus citrinopileatus</i>, <i>Agaricus bisporus</i></p> | P. Saha | 5 |
| <p>2. Cultivation technology: infrastructure: substrates (locally available), polythene bags, vessels, inoculation hook, inoculation loop, low cost stoves, sieves, culture racks, mushroom unit (thatched house), water sprayer, tray, small polythene bag. Pure culture: medium, sterilization, preparation of spawn, multiplication. Mushroom bed preparation- paddy straw, sugarcane trash, maize straw, banana leaves,. Factors affecting the mushroom bed preparation- low cost technology, composting technology in mushroom production.</p> | P. Chatterjee | 12 |
| <p>3. Storage and nutrition: short term storage (Refrigeration- upto 24 hours), long term storage (canning, pickels, papads), drying, storage in salt solutions. Nutrition- proteins- amino acids, mineral elements nutrition- carbohydrates, crude fibre content- vitamins.</p> | M. Karmakar | 8 |
| <p>4. Food preparation: type of foods prepared from mushroom. Research centres- National level and regional level. Cost benefit ratio- marketing in India and abroad. Export value.</p> | T. Biswas | 5 |

| SEMESTER 5 | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|--------------------|
| CORE COURSE 11: Cell and Molecular biology | | |
| BOTA-CC5-11-TH | | |
| 4 Credits | | |
| Cell and Molecular biology | | Full marks 50 |
| Fifth Semester: July-December | | |
| Topic | Name of the Teacher | Number of Lectures |
| 1. Origin and Evolution of Cells: 1.1. Evolution of nucleic acid (from PNA to DNA), Concept of RNA world, Ribozymes, First cell, 1.2. Origin of eukaryotic cell (endosymbiotic theory), 1.3. | T. Biswas | 6 |
| Small RNA- riboswitch, RNA interference, si RNA, mi RNA- brief idea, 1.4. Organellar DNA (cp- and mt- DNA). 2. Nucleus and Chromosome: 2.1. Nuclear envelope, Nuclear lamina and Nuclear pore complex, 2.2. Nucleolus-ultrastructure and ribosome biogenesis, 2.3. Chromatin ultrastructure and DNA packaging in eukaryotic chromosome, 2.4. Centromere: types, structure and function. 3. Cell cycle and its regulation: 3.1. Kinetochore and spindle apparatus-structural organization and functions, 3.2. Microtubules structure, organization and function, 3.3. Mechanism of cell cycle control in Yeast (checkpoints and role of MPF), Apoptosis (Brief idea). MOLECULAR BIOLOGY 1. DNA Replication, Transcription and Translation (Prokaryotes & Eukaryotes): 1.1. Central Dogma, 1.2. Semiconservative DNA replication – mechanism, enzymes involved in DNA replication- DNA polymerase, DNA gyrase, Helicase, Ligase, primase and other accessory proteins, 1.3. Eukaryotic replication with special reference to replication licensing factor, assembly of new nucleosome, replication at the end chromosome telomere, telomerase concept, 1.4. Fidelity of DNA replication- prokaryote: nucleotide selection, | T. Biswas | 6 |
| proof reading, mismatch repair; eukaryote: through selection of error prone DNA polymerase, 1.5. Transcription, 1.6 RNA processing, 1.7. Aminoacylation of tRNA, 1.8. Translation. 2. Gene Regulation: 2.1 Concept of Lac-operon, 2.2. Positive and negative | P. Saha | 20 |
| 2.1 Concept of Lac-operon, 2.2. Positive and negative | P. Saha | 4 |

| | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| control. 3. Genetic Code: 3.1 Properties-evidences & exceptions, 3.2. Decipherance of codon (Binding technique). 4. Recombinant DNA Technology: 4.1. Restriction endonuclease, - types and roles, 4.2. Vector (plasmid pBR 322), 4.3. Marker gene, 4.4. Steps of cloning technique, 4.5. PCR and its application, 4.6. Genomic DNA and cDNA library. 5. Development and causes of Cancer (in general and brief), tumor suppressor gene and oncogene. | P. Saha | 4 |
| | P. Saha | 10 |
| | P. Chatterjee | 4 |
| BOTA-CC5-11-P | | |
| 2 Credits | | |
| Cell and Molecular biology | | Full marks 30 |
| Topic | Name of the Teacher | Number of Lectures |
| CELL BIOLOGY 3. Study of plant cell structure with the help of epidermal peel mount of Onion/ <i>Rhoeo/Crinum</i> 4. Measurement of cell size by the technique of micrometry. 5. Counting cells per unit volume with the help of haemocytometer (Yeast/pollengrains) 6. Cytochemical staining of DNA- Pyronine-methyl green staining. 27 7. Estimation of DNA content through DPA staining. 8. Estimation of RNA through orcinol method. 9. Study of nucleolus through hematoxylin/ orcin staining and determination of nucleolar frequency. 10. Preparation of models/ charts: rolling circle, theta replication, semi-discontinuous replication, prokaryotic RNA polymerase and eukaryotic RNA polymerase II, assembly of spliceosome machinery, splicing mechanism in group I and group II introns, ribozyme and alternative splicing. | T. Biswas T. Biswas T. Biswas T. Biswas T. Biswas T. Biswas M. Karmakar | 10 |

| CORE COURSE 12: Biochemistry | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|--------------------|
| BOTA-CC5-12-TH | | |
| 4 Credits | | |
| Biochemistry | | Full marks 50 |
| Fifth Semester: July-December | | |
| Topic | Name of the Teacher | Number of Lectures |
| <p>1. Biochemical Foundations: 1.1. Covalent and non-covalent bonds; hydrogen bond; Van der Waal's forces; 1.2. Structure and properties of water; 1.3. pH and buffer (inorganic and organic); 1.4. Handerson-Hasselbalch equation; 1.5. Isoelectric point.</p> | P. Chatterjee | 6 |
| <p>2. Molecules of life: 2.1. Nucleic Acids – structure of nucleosides and nucleotides ; oligo- and poly nucleotides , B & Z form of DNA, RNA- different forms; nucleotide derivatives (ATP, NADP), 2.2. Proteins – structure and classification of amino acids; primary, secondary, tertiary and quaternary structure of proteins; 2.3. Carbohydrates - structure of mono-, di- and polysaccharide; stereoisomers, enantiomers and epimers; 2.4. Lipids - structure of simple lipid and compound lipid (phospholipids and glycolipids), fatty acids- saturated and unsaturated.</p> | P. Chatterjee | 24 |
| <p>3. Energy flow and enzymology: 3.1. Bioenergetics-Thermodynamic principles; free energy; energy rich bonds- phosphoryl group transfer and ATP; redox potentials and Biological redox reactions, 3.2. Enzymes – classification and nomenclature (IUBMB); Co-factors and co-enzymes; isozymes, 3.3. Mechanism of enzyme action; enzyme inhibition; 3.4. Enzyme kinetics (Michaelis-Menten equation) and simple problems.</p> | P. Chatterjee | 18 |
| <p>4. Cell membrane: 4.1. Membrane chemistry, 4.2. Membrane transport (uniport, symport, antiport), mechanism of ion uptake.</p> | S. Sengupta | 6 |
| <p>5. Phosphorylation: ATP Synthesis- Chemiosmotic model, Oxidative and Photophosphorylation- Mechanism and differences</p> | S. Sengupta | 6 |

| BOTA-CC5-12-P | | |

| PLANT BIOTECHNOLOGY (DSE-A-5-5-TH) | | |
| 4 Credits | | |
| Plant Biotechnology | Full marks 50 | |
| Fifth Semester : January - June | | |
| Topic | Name of the Teacher | Number of Lectures |
| <p>4. Plant tissue culture –Introduction:</p> <ul style="list-style-type: none"> • Basic concept and milestones, 1.2. Cellular totipotency, 1.3. Tissue culture media, 1.4. Aseptic manipulation, 1.5. Cyto-differentiation and dedifferentiation. <p>1. Callus culture:</p> <ul style="list-style-type: none"> • Callus induction, maintenance and application, | <p>T. Biswas</p> | <p>10</p> |

| | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|-----------------------------------------------------------|
| 2.2. Suspension culture- introductory idea. 1. Plant regeneration: 1.1 Organogenesis (direct and indirect), 3.2. Somatic embryogenesis, 3.3. Significance of organogenesis and somatic embryogenesis, 3.4. Artificial seed. | T. Biswas | 6 |
| 4. Haploid Culture: 4.1. Anther and Pollen culture methods, 4.2. Applications. 5. Protoplast Culture: 5.1. Protoplast isolation and culture, 5.2. Protoplast fusion (somatic hybridization), 5.3. Significance. 6. Plant Genetic Engineering: 6.1. Brief concept of different gene transfer methods, special emphasis on <i>Agrobacterium</i> mediated gene transfer, Role of Reporter gene, 6.2. Achievements in crop biotechnology, environment and industry (suitable example)- pest resistant plants (BT cotton), herbicide resistance, disease and stress tolerance, transgenic crop with improved quality (flavr tomato, golden rice), role of transgenic in population degradation (super-bug), leaching of minerals, production of industrial enzymes, oil, edible vaccine. | T. Biswas T. Biswas T. Biswas M. Karmakar | 8 6 6 24 |
| PLANT BIOTECHNOLOGY (DSE-A-5-5-P) | | |
| 2 Credits | | |
| Plant Biotechnology | | Full marks 30 |
| Topic | Name of the Teacher | Number of Lectures |
| PLANT BIOTECHNOLOGY 1. Familiarization of basic equipments in plant tissue culture 2. Study through photographs/ charts/ models of anther culture, somatic embryogenesis, endosperm and embryo culture, micropropagation. 3. Preparation of basal media. Sterilization techniques. 4. Demonstration of any tissue culture technique during visit in a plant tissue culture lab. | T. Biswas T. Biswas T. Biswas T. Biswas | 10 |

| SEMESTER 6 | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|--------------------|
| CORE COURSE 13: Plant physiology | | |
| BOTA-CC6-13-TH | | |
| 4 Credits | | |
| Plant physiology | | Full marks 50 |
| Sixth Semester : July-December | | |
| Topic | Name of the Teacher | Number of Lectures |
| <p>1. Plant-water relations: 1.1 Concept of water potential, components of water potential in plant system, 1.2. Soil-plant-Atmosphere continuum concept, Cavitation in xylem and embolism, 1.3. Stomatal physiologymechanism of opening and closing, Role of carbon di-oxide, potassium ion, abscisic acid and blue light in stomatal movement, Antitranspirants.</p> | P. Chatterjee | 6 |
| <p>2. Mineral nutrition: essential and beneficial elements, macro- and micronutrients, methods of study and use of nutrient solutions, criteria for essentiality, mineral deficiency symptoms, roles of essential elements, chelating agents.</p> | P. Chatterjee | 6 |
| <p>3. Organic Translocation: 3.1. Phloem sap, P-protein, 3.2. Phloem loading and unloading, 3.3. Mass-flow (pressure flow) hypothesis and its critical evaluation.</p> | P. Chatterjee | 6 |
| <p>4. Plant Growth Regulators: 4.1. Physiological roles of Auxin, Gibberellin, Cytokinin, Abscisic acid, Ethylene, 4.2. Chemical nature – IAA, GA3, Kinetin, 4.3. Biosynthesis and bioassay of IAA, 4.4. Mode of action of IAA, 4.5. Brassinosteroids and Polyamines as PGRs (brief idea).</p> | P. Chatterjee | 18 |
| <p>5. Photomorphogenesis: 5.1. Concept of photomorphogenesis, 5.2. Photoperiodism and plant types, 5.3. Perception of photoperiodic stimulus, 5.4. Critical day length, concept of light monitoring, 5.5. Phytochrome, cryptochrome and phototropins- chemical nature and role in photomorphogenesis, 5.6. Role of GA in flowering, 5.7. Vernalisation – role of low temperature in flowering, 5.8. Concept of biological clock and biorhythm.</p> | P. Saha | 12 |
| <p>6. Seed dormancy: 6.1. Types, Causes and Methods of breaking seed dormancy, 6.2. Biochemistry of seed germination.</p> | P. Saha | 6 |
| <p>7. Physiology of Senescence and Ageing.</p> | P. Saha | 6 |

| BOTA-CC6-13-P | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------------|
| 2 Credits | | |
| Plant physiology | | Full marks 30 |
| Topic | Name of the Teacher | Number of Lectures |
| 1.Determination of loss of water per stoma per hour. 2.Relationship between transpiration and evaporation. 3.Measurement of osmotic pressure of storage tissue by weighing method. 4.Measurement of osmotic pressure of <i>Rhoeo</i> leaf by plasmolytic method. 5.Effect of temperature on absorption of water by storage tissue and determination of Q10. 6.Rate of imbibition of water by starchy, proteinaceous and fatty seeds and effect of seed coat. 7.To study the phenomenon of seed germination (effect of light). 8.To study the induction of amylase activity in germinating grains. 9.To study the effect of different concentrations of IAA on <i>Avena</i> coleoptile elongation (IAA bioassay) | P. Chatterjee | 10 |
| CORE COURSE 14: Plant metabolism | | |
| BOTA-CC6-14-TH | | |
| 4 Credits | | |
| Plant metabolism | | Full marks 50 |
| Sixth Semester : July-December | | |
| Topic | Name of the Teacher | Number of Lectures |
| 1. Concept of metabolism: Introduction, Anabolic and catabolic metabolic pathways, regulation of metabolism, role of regulatory enzymes (allosteric, covalent modulation and isozymes) | S. Sengupta | 4 |
| 2. Photosynthesis: 2.1 Chemical structure of chlorophyll a and b, absorption and action spectra, biological significance of carotenoid pigments, 2.2. Red drop and Emerson effect, Components of photosystems (light harvesting complex), photochemical reaction centres, Cyclic and noncyclic electron transport, Water splitting mechanism, 2.3. Calvin cycle – Biochemical reactions & stoichiometry, 2.4. HSK Pathway– three variants of the pathway, 2.5. Photosynthetic efficiency of C3 and C4 plants and crop productivity, 2.6 Photorespiration – mechanism and significance, 2.7 Crassulacean Acid Metabolism– mechanism and ecological significance. | S. Sengupta | 16 |

| | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|----|
| <p>3. Respiration: 3.1 EMP pathway, regulation and its anabolic role, 3.2. Conversion of Pyruvic acid to Acetyl CoA, 3.3. TCA-cycle and its amphibolic role, 3.4. Oxidative pentose phosphate pathway and its significance, 3.5. Mitochondrial electron transport system, uncouplers, 3.6. Oxidation of cytosolic NADH+H⁺, 3.7. Stoichiometry of glucose oxidation (aerobic). 6. Nitrogen Metabolism: 6.1 Assimilation of nitrate by plants, 4.2. Biochemistry of dinitrogen fixation in Rhizobium, 4.3. General principle of amino acid biosynthesis (including GS and GOGAT enzyme system). i) Lipid metabolism: • synthesis and breakdown of triglycerides, β-oxidation, glyoxalate cycle, gluconeogenesis and its role in mobilization of the lipids during seed germinbations, α- oxidation. 6. Mechanism of signal transduction: receptor-ligand interactions, second messenger concept, calcium-calmodilin, G protein, MAP-kinase cascade.</p> | S. Sengupta | 12 |
| | S. Sengupta | 10 |
| | M. Karmakar | 10 |

| MEDICINAL AND ETHNOBOTANY (DSE-A-6-3-TH) | | |
| 4 Credits | | |
| Medicinal and ethnobotany | | Full marks 50 |
| Sixth Semester : January - June | | |
| Topic | Name of the Teacher | Number of Lectures |
| <p>1. Medicinal botany: History, scope and importance of medicinal plant, a brief idea about indigenous medicinal sciences- ayurveda, siddha and unani. Polyherbal formulations.</p> | R. Bar | 14 |
| <p>2. Pharmacognosy- General account : 2.1 Pharmacognosy and its importance in modern medicine, 2.2 Crude drugs, 2.3 Classification of drugs- chemical and pharmacological, 2.4 Drug evaluation– organoleptic, microscopic, chemical, physical and biological, 2.5. Major pharmacological groups of plant drugs and their uses.</p> | R. Bar | 12 |
| <p>3. Secondary metabolites: 3.1 Definition of secondary metabolites and difference with primary metabolites , 3.2 Interrelationship of basic metabolic pathways with secondary metabolite biosynthesis (outlines only), 3.3 Major types–terpenoids, phenolics, flavonoids, alkaloids and their protective action against pathogenic microbes and herbivores.</p> | R. Bar | 14 |
| <p>4. Pharmacologically active constituents: Source plants (one example) parts used and uses of: 3.1 Steroids (Solasodin, Diosgenin, Digitoxin), 3.2 Tannin (Catechin), 3.3 Resins (Gingerol, Curcuminoids), 3.4 Alkaloids (Quinine, Atropine. Pilocarpine, Strychnine, Reserpine, Vinblastine), 3.5. Phenols (Sennocide and Capsaicin).</p> | P. Saha | 4 |
| <p>5. Ethnobotany and folk medicine: Definition, methods of study, application, Indian scenario, national interacts, Palaeo-ethnobotany, folk medicines in ethnobotany, ethnomedicine, ethnoecology, ethnic communities of India, application of natural products to certain diseases- Jaudice, cardiac, infertility, diabetics, blood pressure and skin diseases.</p> | P. Saha | 16 |

Academic Calendar 2023-2024
Course: B.Sc. (General)
Anthropology Minor: 2023: NEP

Semester I
Core Course: ANT-G-CC-I-TH
First Semester: July to December

| | Topic | Name of the Teacher |
|-----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| ANTA-G-CC-1-TH: Introduction to Anthropology | | |
| | <p>Unit-I: Concept of Anthropology, history, divergence (sub-disciplines/sub-fields), flexibility, holism of Anthropology. Anthropology in relation to other disciplines of Physical and/or Natural sciences, Social sciences, Arts and humanities.</p> <p>Unit-II: i. Introduction to archaeological anthropology, its relation to anthropology, palaeoanthropology, history, prehistory and historical archaeology. ii. A history of archaeology, mentioning only the stages of antiquarianism, Three age Paradigm, Culture history Processual and Post-processual archaeology. iii. A brief idea of palaeo-environment: Glacial, inter-glacial and pluvial, inter-pluvial in high and low latitudes. iv. Methods for reconstructing the past-environmental archaeology, experimental archaeology, Ethno-archaeology, Primate-ethology.</p> | A. Majumdar |
| | <p>Unit-III: a. Biological Anthropology: concept, aim, scope, branches and applications of Biological Anthropology. b. Morphology of human: External morphology; Skeletal morphology-Definition and function of human skeleton. Types and definition of the types of bones. Anthropology IDC: 2023: NEP
Semester I
Course: IDC-TH
First Semester: July to December

| | Topic | Name of the Teacher |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| Anthropology IDC Theory | | |
| | <p>Unit – I : Concept of Anthropology, history, development and sub-disciplines/sub-fields, holism of Anthropology. Anthropology in relation to the disciplines of Physical and / or Natural Sciences, Social Sciences, Arts and Humanities.</p> <p>Unit- II: i. Introduction to Archeological Anthropology, its relation to anthropology, palaeoanthropology, history, prehistory and historical archeology. ii. A brief history of archeology, mentioning only the stages of Antiquarianism, Three Age Paradigm, Culture history, Processual and Post-processual archeology. iii. A brief idea of geological time scale and palaeo-environment: Glacial, inter-glacial and Pluvial, inter-pluvial in high and low latitudes. iv. Methods for reconstructing the past- environmental archeology, experimental archeology, Ethno-archeology, Primate ethology. v. Reconstructing the past lifestyle/cultures from the archaeological record: Brief introduction to the methods of exploration and excavation.</p> | Dr. P. Sarkar |
| | <p>Unit III Biological Anthropology: concept, aim, scope, branches and application of Biological Anthropology. i) Concept of population diversity: UNESCO statement of race (1950, 1952), Paradigm shift from the concept of Race to Ethnic Group. Typological, Populational and Clinal Models. Racial / ethnic composition of the population of undivided India by H.H. Risley, B.S. Guha and S. S. Sarkar.; Relevance of studying population diversity. ii) Human Adaptation: Ecological rules, Adaptation to hot, cold and altitude. iii) Human Evolution: Geological Time scale, Evolution of anatomically modern Homo sapiens from protohominoids [Aegyptopithecus, Proconsul, Dryopithecus, Sivapithecus, Ramapithecus and Gygantopithecus, Australopithecus (gracile and robustus), Homo erectus, Homo neanderthalensis, Archaic Homo</p> | Dr. P. Sarkar |

| | <p>sapiens and Anatomically Modern sapiens] [N.B.- For the above fossil specimens, their chronology, environmental background, distribution, salient anatomical features, and phylogeny to be known as outlines of the whole process of evolution.]</p> | |
| | <p>UNIT IV: Social and Cultural Anthropology</p> <p>a) History of social and cultural anthropology, b) Society : (i) General and particular (ii) Kinship: Evolution, Descent, Exchange and Transaction; (i) Classical Kinship Theories: (e.g, Evolution, Descent and Alliance) Kinship in Simple Society; Clan, Lineage, Segmentary Lineage System, Phratry and Moiety c) Culture: (i) General and particular, (ii) Set of Assumptions [e.g. Keesing 1974] d) Religion: Forms according to E. B. Tylor (Animism, Animatism, Manaism, Polytheism, Monotheism), Shaman, Totem, Taboo: e) Early ideas of Marriage and Family: Features, Types, Rules (e.g. Marital transactions, dowry and bride price, incest taboo) f) Economic Aspects: Reciprocity, redistribution and market exchange (Substantivism) Informal Economy (Keith Hart) g) Early Ideas of Political Organisation for stateless and state societies h) Social stratification : Egalitarian societies, peasant society,, rank society (i.e. tribe, chiefdom, state), class, caste i) The Processes of Change: Diffusion, Innovation, Acculturation, Evolution, Planned Change, Social Movement, Transformation, Hybridization</p> | <p>C. Sherpa</p> |
| | <p>Anthropology IDC Practical</p> | <p>Dr. P. Sarkar & C. Sherpa</p> |
| | <p>A project report based on any one of the topics from Unit I to IV</p> | <p>Dr. P. Sarkar & C. Sherpa</p> |

Part-II: Semester III
Core Course: ANT-G-3-CC/GE-3-TH
First Semester: July to December

| | Topic | Name of the Teacher |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| A | <p>PRIMATE EVOLUTION</p> <p>UNIT – I: THEORIES OF EVOLUTION Lamarckism, Darwinism, Synthetic theory</p> <p>UNIT –II: Living primates</p> <p>a. Definition (Mivart) and general characteristic features of order Primates.</p> <p>b. Evolutionary trends of the Primates.</p> <p>c. Classification of the order Primates –G.G. Simpson (1945) and modified by Simons (1972) with features and example up to family.</p> <p>d. Platyrrhine and Catarrhine monkeys- distribution, characteristics and differences. Anthropoid apes: Features, classification, distribution, and social behavior of the anthropoid apes.</p> <p>e. Skeletal comparison of anthropoid apes with that of man.</p> <p>UNIT – III: Fossil Primates (chronology, features and phylogeny).</p> <p>a. Dryopithecus, Sivapithecus, Ramapithecus</p> <p>b. Earlier hominid-A. afarensis, and A. africanus</p> <p>c. Emergence of genius Homo- H. habilis, H. erectus, (Java and Peking variety).</p> <p>d. Emergence of Archaic Homo sapiens- Neanderthal (La chapelle-aux-saints and Tabun)</p> <p>e. Anatomically Modern Homo sapiens- Cro-Magnon</p> | Dr. P. Sarkar |
| B | <p>ARCHAEOLOGICAL ANTHROPOLOGY</p> <p>Prehistory of India (to be studied on a regional basis).</p> <p>UNIT – I: A brief history of Indian prehistory. The classifications and nomenclatures of the prehistoric cultural periods of India. Study of prehistoric cultures from the earliest evidences up to the beginning of historical times on a regional basis.</p> <p>UNIT – II Palaeolithic India: brief outlines of the following</p> | A. Mazumdar |

| | | |
|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| | <p>regional cultures –a) north India-a) Sohan river valley, Beas-Banganga river valley; b) Central India-Narmada valley; c) Eastern India- Subarnarekha, Tarafeni, Gandheswari river valleys, Mayurbhanj, Keonjhar; d)South India- Kortalayar river valley; e) Western India- Nevasa</p> <p>UNIT – III Microlithic cultures of India: brief outlines of the following regional cultures: a) Eastern India b) Central India c) Western India d) southern India. With reference to teaching the microlithic cultures, focus is to be given more on regional variability and environmental adaptability rather than being site specific. Where ever available, the dates are also to be given.</p> | |
| C | <p>SOCIAL CULTURAL ANTHROPOLOGY</p> <p>Political Anthropology: The major theoretical approaches of political anthropology and or anthropology of power and politics; Political processes, such as factionalism, styles of leadership, political rituals. Comparative study of political institutions in simple and complex cultures; race, regional and/ or linguistic groups, state/nationhood, religions and ethnicity and(inter-) ethnic relations, social movements.</p> <p>Anthropology and Contemporary Social Issues: population growth; poverty, inequality and justice; Issues of gender and sexuality; warfare (nuclear, biological, imperial) and peace; terror; marginalization and exclusion; epidemic diseases and disaster; social movements;</p> <p>Regional Anthropology: South Asia: a) Religion, functions of religion, animism, animatism, nature worship, Regionalism, nationalism in India. B) Varna, Jati/caste, caste system in India, Jajmani system, Caste system and inequalities in India. C) Peasant village: Feature, habitation, economy and changes</p> | C. Sherpa |

Chemistry Odd SEM Academic Calendar 2023-24

Four-year Chemistry Major

SEMESTER-1

PAPER : CHEM-H-CC1-1-Th

Fundamentals of Chemistry – I Theory: (45 Lectures)

Module : I

Extra nuclear structure of atoms: (15 Lectures)

Dr. Satadal Paul

and Periodicity

Dr. Amit Kumar Dutta

Module : II

Basics of Organic Chemistry Bonding and Physical Properties: (10 Lectures)

Valence Bond Theory

Dr. Atreyee Basu

Electronic displacement:

MO Theory

Soumyajit Sett

Physical properties

Stereochemistry – I: (5 Lectures)

Module : III

Thermodynamics -I : (9 Lectures)

Utpal Pradhan

Chemical Kinetics-I: (6 Lectures)

Dr. Satadal Paul

Practical : (30 Lectures)

PAPER : CHEM-H-CC1-1-P

(1) Calibration and use of apparatus.

Dr. Satadal Paul

(2) Preparation of primary standard solutions (Oxalic Acid and $K_2Cr_2O_7$)

Dr. Atreyee Basu

Acid-Base Titrations:

Oxidation-Reduction Titrimetry:

Dr. Amit Kumar Dutta

SKILL ENHANCEMENT COURSE CHEMISTRY

Paper: CHEM-H-SEC1-1-Th

Quantitative Analysis and Basic Laboratory Practices Theory: (45 Lectures)

Module : I

Dr. Satadal Paul

Introduction to Quantitative analysis and its interdisciplinary nature: (15 Lectures)

Numerical problems are to be solved wherever applicable.

Module : II

Soumyajit Sett/ Utpal Pradhan

Titrimetric analysis: (15 Lectures)

Numerical problems are to be solved wherever applicable.

Acid-base titrimetry:

Numerical problems are to be solved wherever applicable.

Redox titrimetry:

Numerical problems are to be solved wherever applicable.

Precipitation titrimetry:

Numerical problems are to be solved wherever applicable.

Complexometric titrimetry:

Numerical problems are to be solved wherever applicable.

Gravimetric Analysis:

Module : III (15 Lectures)

Dr. Amit Kumar Dutta

Water analysis:

Water treatment technologies:

Numerical problems are to be solved wherever required

Basic laboratory practices:

Tutorial: (15 hours)

PAPER: CHEM-H-SEC1-1-Tu **Dr. Satadal Paul/ Utpal Pradhan**

1. Safety Practices in the Chemistry Laboratory, knowledge about common toxic chemicals and safety measures

2. Calibration of glassware, pipette, burette and volumetric flask.

3. Preparation of TLC plates and separation of amino acids

4. Calibration of instruments like colorimeter, pH-meter, conductivity meter.

5. Conductometric titration between HCl and NaOH.

6. Determination of alkali present in soaps/detergents.

Chemistry Hons (CBCS)

SEMESTER-3

CEMA-CC-3-5-TH:

PHYSICAL CHEMISTRY-2

Dr. Satadal Paul

Theory: 60 Lectures

Chemical Thermodynamics I (10 Lectures)

Chemical Thermodynamics II (20 Lectures)

Systems of Variable Composition:

Applications of Thermodynamics – I (06 Lectures)

ELECTROCHEMISTRY: (24 Lectures)

Utpal Pradhan

(i) Conductance and transport number

(ii) Ionic equilibrium:

(iii) Electromotive Force

CEMA-CC-3-5-P:(45 Lectures)

Utpal Pradhan

Experiment 1: Conductometric titration of an acid (strong, weak/ monobasic, dibasic, and acid mixture) against strong base.

Experiment 2: Study of saponification reaction conductometrically

Experiment 3: Verification of Ostwald's dilution law and determination of K_a of weak acid

Experiment 4: Potentiometric titration of Mohr's salt solution against standard $K_2Cr_2O_7$ and $KMnO_4$ solution

Experiment 5: Determination of K_{sp} for $AgCl$ by potentiometric titration of $AgNO_3$ solution against standard KCl solution

Experiment 6: Determination of heat of neutralization of a strong acid by a strong base

CEMA-CC-3-6-TH:

INORGANIC CHEMISTRY-3

Theory: 60 Lectures

Dr. Amit Kumar Dutta

Chemical periodicity (15 Lectures)

Chemistry of *s* and *p* Block Elements (30 Lectures)

Noble Gases:

Inorganic Polymers:

Coordination Chemistry-I (15 Lectures)

CEMA-CC-3-6-P:(45 Lectures)

Dr. Amit Kumar Dutta

Complexometric titration

Chromatography of metal ions

Gravimetry

CEMA-CC-3-7-TH :

ORGANIC CHEMISTRY-3

Theory: 60 Lectures

Chemistry of alkenes and alkynes (15 Lectures)

Addition to C=C

Addition to C≡C (in comparison to C=C)

Aromatic Substitution (10 Lectures)

Electrophilic aromatic substitution

Nucleophilic aromatic substitution

Carbonyl and Related Compounds (30 Lectures)

Exploitation of acidity of α -H of C=O

Nucleophilic addition to α, β -unsaturated carbonyl system:

Organometallics(5 Lectures)

Soumyajit Sett

Dr. Atreyee Basu

CEMA-CC-3-7-P:(45 Lectures)

A. Identification of a Pure Organic Compound

B. Quantitative Estimations:

Dr. Atreyee Basu

SEC 2 – ANALYTICAL CLINICAL BIOCHEMISTRY

Carbohydrates

Proteins

Enzymes

Dr. Atreyee Basu

Dr. Amit Kumar Dutta

Lipids:

Lipoproteins

Biochemistry of disease: A diagnostic approach by blood/ urine analysis.

Chemistry Hons (CBCS)

SEMESTER-5

CEMA-CC-5-11-TH :

PHYSICAL CHEMISTRY – 4

Dr. Satadal Paul

Theory: 60 Lectures

Quantum Chemistry II (30 Lectures)

Simple Harmonic Oscillator:

Angular momentum:

Hydrogen atom and hydrogen-like ions:

Statistical Thermodynamics (20 Lectures)

Utpal Pradhan

Numerical Analysis (10 Lectures)

CEMA-CC-5-11-P :(45 Lectures)

Utpal Pradhan

Computer programs(Using FORTRAN or C or C ++) based on numerical methods :

CEMA-CC-5-12-TH :

ORGANIC CHEMISTRY – 5

Soumyajit Sett

Theory: 60 Lectures

Carbocycles and Heterocycles (16 lectures)

Cyclic Stereochemistry (10 Lectures)

Pericyclic reactions (08 Lectures)

Carbohydrates (14 Lectures)

Dr. Atreyee Basu

Biomolecules (12 Lectures)

CEMA-CC-5-12-P:(45 Lectures)

Soumyajit Sett

A. Chromatographic Separations

B. Spectroscopic Analysis of Organic Compounds

DSE-A-2: APPLICATIONS OF COMPUTERS IN CHEMISTRY

Utpal Pradhan

Theory: 60 Lectures

Computer Programming Basics (FORTRAN): (Lectures: 20)

Introduction to Spreadsheet Software (MS Excel): (Lectures 25)

Statistical Analysis: (Lectures: 15)

PRACTICALS

Utpal Pradhan

(45 Lectures)

1. Plotting of Graphs using a spreadsheet. (Planck's Distribution Law, Maxwell Boltzmann Distribution Curves as a function of temperature and molecular weight)
2. Determination of vapour pressure from Van der Waals Equation of State.
3. Determination of rate constant from Concentration-time data using **LINEST** function.
4. Determination of Molar Extinction Coefficient from Absorbent's data
5. Determination of concentration simultaneously using Excel **SOLVER** Function
6. Simultaneous Solution of Chemical Equilibrium Problems
7. Determination of Molar Enthalpy of Vaporization
8. Calculation and Plotting of a Precipitation Titration Curve with MS Excel.
9. Acid-Base Titration Curve using Excel **Goal Seek** Function.
10. Plotting of First and Second Derivative Curve for pH metric titration.
11. Use of spreadsheet to solve the 1D Schrodinger Equation
12. Michaelis-Menten Kinetics for Enzyme Catalysis

DSE-B

DSE-B-1: INORGANIC MATERIALS OF INDUSTRIAL IMPORTANCE

Theory: 60 Lectures

Silicate Industries: (16 Lectures)

Dr. Amit Kumar Dutta

Glass

Ceramics:

Cements:

Fertilizers: (8 Lectures)

Surface Coatings: (10 Lectures)

Batteries: (6 Lectures)

Alloys: (10 Lectures)

Catalysis: (6 Lectures)

Chemical explosives: (4 Lectures)

PRACTICALS (45 Lectures) Dr. Amit Kumar Dutta/ Dr. Satadal Paul

1. Determination of free acidity in ammonium sulphate fertilizer.
2. Estimation of Calcium in Calcium ammonium nitrate fertilizer.
3. Estimation of phosphoric acid in superphosphate fertilizer.
4. Electroless metallic coatings on ceramic and plastic material.
5. Determination of composition of dolomite (by complexometric titration).
6. Analysis of (Cu, Ni); (Cu, Zn) in alloy or synthetic samples.
7. Analysis of Cement.

**Three-year MULTIDISCIPLINARY Studies Chemistry (CC1)
CHEMISTRY MDC**

PAPER : CHEM-MD-CC1-1-Th /CHEM-MD-CC1-3-Th

Theory: (45 Lectures)

Module : I (15 Lectures)

Extra nuclear structure of atoms

Dr. Satadal Paul

and Periodicity:

Dr. Amit Kumar Dutta

Module : II

Basics of Organic Chemistry Bonding and Physical Properties: (10 Lectures)

Valence Bond Theory

Dr. Atreyee Basu

Electronic displacements

Soumyajit Sett

MO Theory

Physical properties

Stereochemistry – I (05 Lectures)

Module : III

Thermodynamics -I : (9 Lectures)

Utpal Pradhan

Chemical Kinetics-I: (6 Lectures)

Dr. Satadal Paul

Practical : (30 Lectures)

PAPER: CHEM-MD-CC1-1-P / CHEM-MD-CC1-3-P

(1) Calibration and use of apparatus.

Dr. Satadal Paul

(2) Preparation of primary standard solutions (Oxalic Acid and $K_2Cr_2O_7$)

Acid-Base Titrations:

Dr. Atreyee Basu

Oxidation-Reduction Titrimetry:

Dr. Amit Kumar Dutta

SKILL ENHANCEMENT COURSE

CHEMISTRY

PAPER : CHEM-MD-SEC-Th

Theory: (45 Lectures)

CHEMISTRY IN DAILY LIFE

Module : I (15 Lectures)

Dairy Products:

Food additives, adulterants, and contaminants:

Artificial food colorants:

Module : II (15 Lectures)

Vitamins:

Oils and fats:

Soaps & Detergents:

Module : III (15 Lectures)

Chemical and Renewable Energy Sources:

Polymers:

Tutorial: (15 hours)

PAPER: CHEM-MD-SEC-Tu

1. Estimation of Vitamin C
2. Determination of Iodine number of oil.
3. Determination of saponification number of oil.
4. Determination of methyl alcohol in alcoholic beverages.

Chemistry General (CBCS)

SEMESTER-3

CC3/GE 3:

Theory: 60 Lectures

Chemical Bonding and Molecular Structure

Dr. Satadal Paul

Comparative study of p-block elements:

Dr. Amit Kumar Dutta

Transition Elements (3d series)

Coordination Chemistry

ELECTROCHEMISTRY

Utpal Pradhan

1) Ionic Equilibria

2) Conductance

3) Electromotive force

Aromatic Hydrocarbons

Dr. Atreyee Basu

Organometallic Compounds

Aryl Halides

CC3/GE 3 Practical: 45 Lectures

Dr. Amit Kumar Dutta

Qualitative semimicro analysis of mixtures containing two radicals. Emphasis should be given to the understanding of the chemistry of different reactions.

Chemistry General (CBCS)

SEMESTER-5

DSE-A-2: INORGANIC MATERIALS OF INDUSTRIAL IMPORTANCE

Theory: 60 Lectures

Silicate Industries: (16 Lectures)

Dr. Amit Kumar Dutta

Fertilizers: (8 Lectures)

Surface Coatings: (10 Lectures)

Batteries: (6 Lectures)

Alloys: (10 Lectures)

Catalysis: (6 Lectures)

Chemical explosives: (4 Lectures)

PRACTICALS

(45 Lectures)

Dr. Amit Kumar Dutta / Dr. Satadal Paul

1. Determination of free acidity in ammonium sulphate fertilizer.
2. Estimation of Calcium in Calcium ammonium nitrate fertilizer.
3. Estimation of phosphoric acid in superphosphate fertilizer.
4. Electroless metallic coatings on ceramic and plastic material.
5. Determination of composition of dolomite (by complexometric titration).
6. Analysis of (Cu, Ni); (Cu, Zn) in alloy or synthetic samples.
7. Analysis of Cement.
8. Preparation of pigment (zinc oxide).

Chemistry Even SEM Academic Calendar 2023-24

Four-year Chemistry Major

SEMESTER-2

PAPER : CHEM-H-CC2-2-Th

Fundamentals of Chemistry – II Theory: (45 Lectures)

Module : I

Kinetic Theory and Gaseous state: (8 Lectures)

Utpal Pradhan

Real gas and Virial equation: (7 Lectures)

Dr. Satadal Paul

Module : II

Chemical Bonding – I: (15 Lectures)

Dr. Amit Kumar Dutta

Module : III

Stereochemistry – II: (8 Lectures)

Soumyajit Sett

General Treatment of Reaction Mechanism –I: (7 Lectures) Dr. Atreyee Basu

Reactive intermediates

Reaction thermodynamics

Reaction kinetics

Substitution Reaction

Practical : (30 Lectures)

PAPER: CHEM-H-CC2-2-P Dr. Satadal Paul/ Dr. Amit Kumar Dutta

(1) Standardization of $\text{Na}_2\text{S}_2\text{O}_3$ solution against standard $\text{K}_2\text{Cr}_2\text{O}_7$ solution.

Iodo-/ Iodimetric Titrations

Estimation of metal content in some selective samples

SKILL ENHANCEMENT COURSE CHEMISTRY

Paper : CHEM-H-SEC2-2-Th Theory: (45 Lectures)

AI for Everyone

Module I

Introduction to Artificial Intelligence, Subfields and Technologies: (15 Lectures)

Module II

Applications of AI and Ethical and Social Implications of AI : (15 Lectures)

Module III

Other Important Issues: (15 Lectures)

SEMESTER-4 (CBCS)

CEMA-CC-4-8-TH :

Organic Chemistry-4

Nitrogen compounds (12 Lectures)

Soumyajit Sett

Rearrangements(14 Lectures)

The Logic of Organic Synthesis (14 Lectures)

Organic Spectroscopy (20 Lectures)

CEMA-CC-4-8-P:(45 Lectures)

Dr. Atreyee Basu

Experiment: Qualitative Analysis of Single Solid Organic Compounds

CEMA-CC-4-9-TH :

Physical Chemistry 3 Theory: 60 Lectures

Application of Thermodynamics – II (20 lectures)

Utpal Pradhan

Foundation of Quantum Mechanics (25 Lectures)

Dr. Satadal Paul

Crystal Structure (15 Lectures)

CEMA-CC-4-9-P :(45 Lectures)

Utpal Pradhan

Experiment 1: Kinetic study of inversion of cane sugar using a Polarimeter

Experiment 2: Study of Phase diagram of Phenol-Water system.

Experiment 3: Determination of partition coefficient

Experiment 4: Determination of pH of unknown solution

Experiment 5: pH-metric titration of acid (mono- and di-basic) against strong base

Experiment 6 : pH-metric titration of a tribasic acid against strong base.

CEMA-CC-4-10-TH

Inorganic Chemistry-4 Theory: 60 Lectures

Coordination Chemistry-II (30 Lectures)

Dr. Amit Kumar Dutta

Chemistry of d- and f- block elements (15 Lectures)

Reaction Kinetics and Mechanism (15 Lectures)

CEMA-CC-4-10-P (45 Lectures)

Inorganic preparations

Dr. Amit Kumar Dutta

Instrumental Techniques

1. Measurement of 10Dq by spectrophotometric method.

2. Determination of λ_{\max} of $[\text{Mn}(\text{acac})_3]$ and $[\text{Fe}(\text{acac})_3]$ complexes.

SEMESTER- 6 (CBCS)

CEMA-CC-6-13-TH:

Inorganic Chemistry-5 Theory: 60 Lectures

Theoretical Principles in Qualitative Analysis (10 Lectures)

Dr. Amit Kumar Dutta

Bioinorganic Chemistry (25 Lectures)

Organometallic Chemistry (25 Lectures)

CEMA-CC-6-13-P: (45 Lectures)

Dr. Amit Kumar Dutta

Qualitative semimicro analysis of mixtures containing not more than three radicals. Emphasis should be given to the understanding of the chemistry of different reactions.

CEMA-CC-6-14-TH:

Physical Chemistry-5 Theory: 60 Lectures

Molecular Spectroscopy (25 Lectures)

Dr. Satadal Paul

Photochemistry and Theory of reaction rate: (15 Lectures)

Surface phenomenon (15 Lectures)

Utpal Pradhan

Dipole moment and polarizability: (05 Lectures)

CEMA-CC-6-14-P: (45 Lectures)

Utpal Pradhan

Experiment 1: Determination of surface tension of a liquid using Stalagmometer

Experiment 2: Determination of the indicator constant of an acid base indicator

Experiment 3: Verification of Beer and Lambert's Law for KMnO_4 and $\text{K}_2\text{Cr}_2\text{O}_7$

Experiment 4: Study of kinetics of $\text{K}_2\text{S}_2\text{O}_8 + \text{KI}$ reaction, spectrophotometrically

Experiment 5: Determination of pH of unknown buffer, spectrophotometrically

Experiment 6: Determination of CMC of a micelle from Surface Tension Measurement.

DSE-A

DSE A-1: MOLECULAR MODELLING AND DRUG DESIGN

Dr. Satadal Paul

DSE-A-2: APPLICATIONS OF COMPUTERS IN CHEMISTRY

Utpal Pradhan

DSE-A-3: GREEN CHEMISTRY AND CHEMISTRY OF NATURAL PRODUCTS

Soumyajit Sett

DSE-A4: ANALYTICAL METHODS IN CHEMISTRY

Dr. Amit Kumar Dutta

DSE-B

DSE-B-1: INORGANIC MATERIALS OF INDUSTRIAL IMPORTANCE

Dr. Amit Kumar Dutta

DSE B-2: NOVEL INORGANIC SOLIDS

Dr. Amit Kumar Dutta

DSE-B-3: POLYMER CHEMISTRY

Semester-I and II

| Sem | Courses | Title | Credits |
|-----|-----------------------------------------------|-------------------------------------------------|---------|
| I | DSC/CC-1 TH (Core Course-1) Theory | Computer Fundamental & Digital Logic(MKB) | 3 |
| | DSC/CC-1-P (Core Course-1) Practical | Computer Fundamental & Digital Logic Lab(MKB) | 1 |
| | SEC-1 Theory | Data visualization using spreadsheet(SG) | 3 |
| | SEC-1 Practical | Data visualization using spreadsheet Lab(SG) | 1 |
| II | CMS-A-CC-2-3-TH (Core Course – 3) Theory | Data Structure(SK) | 4 |
| | CMS-A-CC-2-3-P (Core Course – 3) Practical | Data Structure Lab.(SK) | 2 |
| | CMS-A-CC-2-4-TH (Core Course – 4) Theory | Basic Electronic Devices and Circuits(MKB) | 4 |
| | CMS-A-CC-2-4-P (Core Course – 4) Practical | Basic Electronic Devices and Circuits Lab.(MKB) | 2 |

Semester-III and IV

| Sem | Courses | Title | Credits |
|-----|---------------------------------------------|---------------------------------------------|---------|
| III | CMS-A-CC-3-5-TH (Core Course-5) Theory | Computer Architecture and Organization(BPR) | 4 |
| | CMS-A-CC-3-5-P (Core Course-5) Practical | Computer Organization Lab(MKB) | 2 |

| | | | |
|----|--------------------------------------------|-------------------------------------------------------------|---|
| | CMS-A-CC-3-6-TH (Core Course-6) Theory | Computational Mathematics(PR) | 4 |
| | CMS-A-CC-3-6-P (Core Course-6) Practical | Computational Mathematics Lab(PR) | 2 |
| | CMS-A-CC-3-7-TH(Core Course-7)Theory | Operating Systems(SK) | 4 |
| | CMS-A-CC-3-7-P(Core Course-7) Practical | Operating Systems Lab(SK) | 2 |
| | SEC-A-1(Theory) CMS-A-SEC-A-3-1-TH | Computer Graphics(BPR) | 2 |
| IV | CMS-A-CC-4-8-TH (Core Course – 8) Theory | Data Communication, Networking and Internet technology(BPR) | 4 |
| | CMS-A-CC-4-8-P (Core Course – 8) Practical | Computer Networking and Web Design Lab(BPR) | 2 |
| | CMS-A-CC-4-9-TH (Core Course – 9) Theory | Introduction to Algorithms and its Applications(SG+SK) | 4 |
| | CMS-A-CC-4-9-P (Core Course – 9) Practical | Algorithms Lab(SG+SK) | 2 |
| | CMS-A-CC-4-10-TH(Core Course-10)Theory | Microprocessor and Its Applications(MKB) | 4 |
| | CMS-A-CC-4-10-P(Core Course-10)Practical | Programming with Microprocessor 8085(MKB) | 2 |
| | SEC-B-1(Theory) CMS-A-SEC-B-4-1-TH | Information Security(PR) | 2 |

Semester-V and VI

| Sem | Courses | Title | Credits |
|-----|----------------------------------------------|---------------------------------------------------|---------|
| V | CMS-A-CC-5-11-TH (Core Course-11) Theory | Database Management system (SG) | 4 |
| | CMS-A-CC-5-11-P (Core Course-11) Practical | RDBMS lab using My SQL & PHP (SG) | 2 |
| | CMS-A-CC-5-12-TH (Core Course-12) Theory | Object Oriented Programming (PR) | 4 |
| | CMS-A-CC-5-12-P (Core Course-12) Practical | OOPs lab using JAVA (PR) | 2 |
| | CMS-A-DSE-A-2-TH (DSE-A-2 Theory) | Data Mining & its Application (SG) | 4 |
| | CMS-A-DSE-A-2-P (DSE-A-2 Practical) | Data Mining Lab (SG) | 2 |
| | CMS-A-DSE-B-2-TH (DSE-B-2 Theory) | Programming using Python (BPR) | 4 |
| | CMS-A-DSE-B-2-P (DES-B-2-Practical) | Programming in Python Lab(BPR) | 2 |
| VI | CMS-A-CC-6-13-TH (Core Course – 13) Theory | Software Engineering(SG) | 4 |
| | CMS-A-CC-6-14-TH (Core Course – 14) Theory | Theory of Computation(PR) | 4 |
| | CMS-A-CC-6-14-P (Core Course – 14) Practical | Project(SG,MKB,BPR,PR,SK) | 4 |
| | CMS-A-DSE-A-4-TH (DSE-A-4-Theory) | Multimedia and its Application(BPR) | 4 |
| | CMS-A-DSE-A-4-P (DSE-A-4 Practical) | Multimedia and its Application Lab(BPR) | 2 |
| | CMS-A-DSE-B-4-TH (DSE-B-4 Theory) | Introduction to Computational Intelligence(SG+PR) | 4 |
| | CMS-A-DSE-B- | Computational Intelligence Lab(SG+PR) | 2 |

| | | | |
|--|-----------------------------|--|--|
| | 4-P (DES-B-4- Practical) | | |
|--|-----------------------------|--|--|

Semester-I

DSC/CC-1 : Computer Fundamental and Digital Logic

Theory: 03 Credits: 45 hours

- **Computer Fundamentals: (02 hours)**
- **Number Systems: (03 hours)**
- **Boolean Algebra: (04 hours)**
- **Combinational Circuits: (19 hours)**
- **Sequential Circuits: (17 hours)**
- **Integrated Circuits (Concept only): (04 hours)**

Practical: 01 Credits: 30 hours

- **Combinational Circuits**
- **Sequential Circuits**

CMSA-SEC-1: Data visualization using spreadsheet

Theory: 03 Credits: 45 hours

- **Introduction to spreadsheet: (02 hours)**
- **Working with Data and Tables: (02 hours)**
- **Performing Calculations on Data: (02 hours)**
- **Changing Workbook Appearance: (02hours)**
- **Data analysis and Manipulation: (04 hours)**
- **Advanced Spreadsheet features: (04hours)**
- **Statistical functions and analysis: (05 hours)**
- **Pivot tables and data aggregation: (04 hours)**
- **Advanced data visualization: (05hours)**
- **Exploratory data analysis: (04 hours)**
- **Advanced analysis technique: (04 hours)**
- **Reporting and presentation of results: (03 hours)**
- **Collaborating and sharing: (04 hours)**

Practical: 01 Credits: 30 hours

Semester-II

CMS-A-CC-2-3-TH: Data Structure

Core Course-3: Theory: 04 Credits: 60 hours

- **Introduction to Data Structure: (01 hour)**
- **Arrays: (05 hours)**
- **Linked Lists: (09 hours)**
- **Stacks: (05 hours)**
- **Queues: (05 hours)**
- **Recursion: (05 hours)**
- **Trees: (15 hours)**
- **Searching and Sorting: (10 hours)**
- **Hashing: (05 hours)**

CMS-A-CC-2-3-P: Data Structure Lab.

Core Course- 3: Practical: 02 Credits: 40 hours

CMS-A-CC-2-4-TH: Basic Electronic Devices and Circuits

Core Course-4: Theory: 04 Credits: 60 hours

- **Basics of Circuit Theory: (04 hours)**
- **Theory of Semiconductor devices: (03 hours)**
- **Diode and its applications: (09 hours)**
- **Bipolar Junction Transistor: (08 hours)**
- **Unipolar Junction Transistor: (08 hours)**
- **PNP Devices: (08 hours)**
- **Operational Amplifiers (OPAMP): (12 hours)**
- **Timer: (04 hours)**
- **Data Acquisition: (04 hours)**

CMS-A-CC-2-4-P: Basic Electronic Devices and Circuits Lab.

Core Course-4: Practical: 02 Credits: 40 hours

Semester-III

CMS-A-CC-3-5-TH: Computer Organization and Architecture

Core Course- 5: Theory, Credits:04, Contact hours: 60.

- **Basic Structure of Computers (Qualitative Discussion) (5 hours)**
- **Register Transfer and Micro-operation(5 hours)**
- **Basic Computer Organization and Design(05 hours)**
- **CPU Organization(06 hours)**
- **Control Unit(07 hours)**
- **CPU Registers(06 hours)**
- **Instructions.(3 hours)**
- **CISC and RISC processors(03 hours)**
- **Computer Peripherals(08 hours)**
- **Input / Output Organization(02 hours)**
- **Memory(10 hours)**

CMS-A-CC-3-5-P: Computer Organization Lab.

Core Course-5, Practical, Credits: 02, Contact hours:40.

CMS-A-CC-3-6-TH: Computational Mathematics

Core Course- 6: Theory, Credits: 04, Contact hours: 60.

- **Introduction(10 hours)**
- **Introduction to Probability(10 hours)**
- **Growth of Functions(4 hours)**
- **Recurrences(6 hours)**
- **Numerical Methods (Algorithmic Approach)(20 hours)**
- **Graph Theory(10 hours)**

CMS-A-CC-3-6-P: Computational Mathematics Lab.

Core Course- 6: Practical, Credits:02, Contact hours: 40.

Lab. based on Numerical Methods using C.

CMS-A-CC-3-7-TH: Operating Systems

Core Course- 7: Theory, Credit: 04, Contact hours: 60.

- **Introduction(6 hours)**
- **Operating System Organization(6 hours)**
- **Process(18 hours)**
- **Deadlock(9 hours)**
- **Memory Management(14 hours)**
- **File and I/O Management(5 hours)**
- **Protection and Security(2 hours)**

CMS-A-CC-3-7-P: Operating Systems Lab.

Core Course- 7: Practical, Credit: 02, Contact hours: 40.

- **Shell programming in LINUX**

CMS-A-SEC-A-3-1-TH: Computer Graphics

Skill Enhancement Course: SEC-A: Choice -1: Theory, Credit:02, Contact hours: 40.

- **Introduction(05 hours)**
- **Basic geometrical shapes formation algorithms(05 hours)**
- **Two and Three Dimensional Transformations(14 hours)**
- **Two Dimensional Clipping(08 hours)**
- **Projection(06 hours)**
- **Applications(02 hours)**

Semester-IV

CMS-A-CC-4-8-TH: Data Communication, Networking and Internet Technology.

Core Course- 8: Theory, Credit: 04, Contact hours: 60.

- **Overview of Data Communication and Networking(04hours)**
- **Physical Layer(12hours)**
- **Bandwidth Utilization Techniques(4 hours)**
- **Transmission Medium(06hours)**
- **Switching and Telephone network(04hours)**
- **Data link Layer(04hours)**
- **Medium Access sub layer(08hours)**
- **Network layer(11 hours)**
- **Transport layer(03 hours)**
- **Application Layer(04hours)**

CMS-A-CC-4-8-P: Computer Networking and Web Design Lab

Core Course- 8: Practical, Credit: 02, Contact hour: 40.

- **Computer Networks: Practical(05 hours)**
- **Web Design: Practical(20 hours)**
- **Array(15 hours)**

CMS-A-CC-4-9-TH: Introduction to Algorithms & its Applications
Core Course- 9: Theory, Credit: 04, Contact hours: 60.

- **Introduction to Algorithms(05 hours)**
- **Asymptotic Complexity Analysis of Algorithms(10 hours)**
- **Algorithm Design Techniques(15 hours)**
- **Graph Representation and Algorithm(25 hours)**
- **Classification of Problems(05 hours)**

CMS-A-CC-4-9-P: Algorithms Lab.
Core Course- 9: Practical, Credit:02, Contact hour: 40.

Lab. based on Graph Theory using C

- **Graph Algorithms:**

CMS-A-CC-4-10-TH: Microprocessor and its Applications
Core Course- 7: Theory, Credits:04, Contact hours: 60.

- **Introduction to Microcomputer based system(03 hours)**
- **Microprocessor Architecture and Memory Interfacing(14 hours)**
- **Interfacing I/O Devices(10 hours)**
- **Programming 8085(10 hours)**
- **Interfacing Peripheral Devices and Applications(13 hours)**
- **Microprocessor 8086(10 hours)**

CMS-A-CC-4-10-P:Programming with Microprocessor 8085
Core Course- 10: Practical, Credits:02, Contact hours: 40.

Skill Enhancement Course: SEC-B: Information Security/ E-Commerce

CMS-A-SEC-B-4-1-TH: Information Security

Skill Enhancement Course: SEC-B: Choice-1: Theory, Credit:02, Contact Hours: 40.

- **Overview(05 hours)**
- **Cryptography(10 hours)**
- **Finite Field and Number Theory(03 hours)**
- **Hash Functions and Digital Signatures(05 hours)**
- **Internet Firewalls for Trusted System(02 hours)**
- **E-Mail, IP & Web Security (Qualitative study)(05 hours)**
- **Attacks, Secure Electronic Transaction (SET).(10 hours)**

Semester-V

CMS-A-CC-5-11-TH: Database Management System (DBMS).
Core Course- 11: Theory, Credit: 04, Contact hour: 60 hours.

- **Introduction (04hours)**
- **Entity Relationship(ER) Modeling (04hours)**
- **Relational Model (08hours)**
- **Integrity Constraints (04hours)**
- **Relational Database Design (16hours)**

- **SQL(16hours)**
- **Record Storage and File Organization (Concepts only) (08hours)**

CMS-A-CC-5-11-P: Relational Database Management System

Core Course- 11, Practical, Credit:02, Contact hours: 40 hours.

- **RDBMS Lab using My SQL & PHP**

CMS-A-CC-5-12-TH: Object Oriented Programming System (OOPs)

Core Course- 12: Theory, Credit:04, Contact hours: 60.

- **Concept of OOPs(02hours)**
- **Introduction to Java(04hours)**
- **Arrays, Strings and I/O(08hours)**
- **Object-Oriented Programming Overview(04hours)**
- **Inheritance, Interfaces, Packages, Enumerations, Autoboxing and Metadata.(14hours)**
- **Exception Handling, Threading, Networking and Database Connectivity(15hours)**
- **Applets (13hours)**

CMS-A-CC-5-12-P: Object Oriented Programming Lab.

Core Course- 12: Practical, Credit: 02, Contact hours: 40 hours.

- **OOPs Lab Using JAVA**

CMS-A-DSE-A-2-TH: Data Mining and its Applications

DSE-A: Choice-2: Theory, Credit:04, Contact hours: 60.

- **Introduction(15hours)**
- **Classification and Prediction(30hours)**
- **Data Warehousing (DWH)(15hours)**

CMS-A-DSE-A--2-P: Data Mining Lab.

DSE-A: Choice-2: Practical, Credit:02, Contact hours: 40.

- **Data mining using PYTHON/C**

CMS-A-DSE-B--2-TH: Programming using Python 3

DSE-B: Choice-2: Theory, Credit: 04, Contact hour: 60.

- **Introduction to the Python (04 hours)**
- **Strings, Lists, Tuples (06 hours)**
- **Conditionals, Iterators, and Generators(15 hours)**
- **User-defined Functions and Recursion(10 hours)**
- **File Handling and Exception Handling(05 hours)**
- **Unordered data types - Sets and Dictionaries(05 hours)**
 - **Basic concepts of hashing**
 - **Sets and frozensets**
 - **Dictionaries**
- **Intro to Object Oriented Programming (15 hours)**

CMS-A-DSE-B--2-P: Python 3 Programming Lab.

DSE-B: Choice-2, Practical, Credit: 02, Contact hours: 40 hours.

Use Python 3.6 or above. Use a text editor sensitive to whitespace like Notepad++, gedit, vim, Sublime Text, and NOT Notepad / WordPad. The following exercises are suggestive in nature.

Semester-VI

CMS-A-CC-6-13-TH: Software Engineering.

Core Course-13: Theory, Credit:04, Contact hours 60.

- **Introduction(03 hours)**
- **Software Life Cycle(07 hours)**
- **Software Requirement and Specification Analysis(23 hours)**
- **Software Testing(17 hours)**
- **Software Quality Assurances(10 hours)**

CMS-A-CC-6-14-TH: Theory of Computation.

Core Course-14: Theory, Credit:04, Contact hours: 60.

- **Finite Automata (15 hours)**
- **Formal Languages and Grammar (15 hours)**
- **Regular Expression (15 hours)**
- **Turing Machine (15 hours)**

CMS-A-CC-6-14-P: ProjectWork

Core Course-14, Practical, Credit:04, Contact hours: 60.

Candidates have to do their project in any relevant topic, under the supervision of teachers.

CMS-A-DSE-A--4-TH: Multimedia and its Applications

DSE-A: Choice-4, Theory, Credit:04, Contact hours: 60.

- **Multimedia (04 hours)**
- **Making Multimedia (06 hours)**
- **Text (04 hours)**
- **Images (06 hours)**
- **Sound (06 hours)**
- **Video (06 hours)**
- **Animation (08 hours)**
- **Multimedia System (10 hours)**
- **Multi-modal Communication (10 hours)**

CMS-A-DSE-A-4-P: Multimedia and its Applications Lab.

DSE-A: Choice-4: Practical, Credit:02, Contact hour: 40.

Sample practical problems can be included related to theory.

CMS-A-DSE-B-3-TH: Introduction to Computational Intelligence

DSE-B: Choice-3, Theory, Credit:04, Contact hours: 60.

- **Introduction: (20 hours)**

- **Neural network: (20 hours)**
- **Rough sets: (02 hours)**
- **Fuzzy logic and application: (18 hours)**

CMS-A-DSE-B-4-P: Computational Intelligence Laboratory
DSE-B: Choice 4, Practical, Credit:02, Contact hours: 40.

Computer Science General

Course Structure

| Semester | Courses | Title | Credits |
|-----------|-----------------------------------------------------|------------------------------------------------------------|---------|
| SEM- I | DSC/CC-1 TH (Core Course-1) Theory | Computer Fundamental & Digital Logic(MKB) | 03 |
| | DSC/CC-1-P (Core Course-1) Practical | Computer Fundamental & Digital Logic Lab(MKB) | 01 |
| | SEC-1 Theory | Data visualization using spreadsheet(SG) | 03 |
| | SEC-1 Practical | Data visualization using spreadsheet Lab(SG) | 01 |
| | IDC | Fundamental of Computer Science and applications(PR+SK) | 03 |
| SEM - II | CMS-G-CC-2-2-TH Sem-2-Core Course- 2 Theory | Algorithms and Data Structure(BPR) | 04 |
| | CMS-G-CC-2-2-P Sem-2-Core Course- 2 Practical | Programming with C(BPR) | 02 |
| SEM - III | CMS-G-CC-3-3-TH Sem-3-Core Course- 3 Theory | Computer Organization (PR) | 04 |
| | CMS-G-CC-3-3-P Sem-3-Core Course- 3 Practical | Programming using Python (PR) | 02 |
| SEM - IV | CMS-G-CC-4-4-TH Sem-4-Core Course- 4 Theory | Operating Systems (SK) | 04 |
| | CMS-G-CC-4-4-P Sem-4-Core Course- 4 Practical | Shell Programming (Unix/ Linux) (SK) | 02 |
| SEM - V | CMS-G-DSE-A-5-1-TH | Data base Management System (DBMS) (SK+BPR) | 04 |
| | CMS-G-DSE-A-5-1-P | DBMS Lab using SQL(SK+BPR) | 02 |
| | CMS-G-SEC-A-2 | Software Engineering(SK) | 02 |
| SEM - VI | CMS-G-DSE-B-6-3-TH | Computational Mathematics (PR) | 04 |
| | CMS-G-DSE-B-6-2-P | Computational Mathematics Lab using C (PR) | 02 |
| | CMS-G-SEC-B-6-1-TH | Multimedia and its Applications (BPR) | 02 |

Semester-I

DSC/CC-1 : Computer Fundamental and Digital Logic

Theory: 03 Credits: 45 hours

- **Computer Fundamentals: (02 hours)**
- **Number Systems: (03 hours)**
- **Boolean Algebra: (04 hours)**
- **Combinational Circuits: (19 hours)**
- **Sequential Circuits: (17 hours)**
- **Integrated Circuits (Concept only): (04 hours)**

Practical: 01 Credits: 30 hours

- **Combinational Circuits**
- **Sequential Circuits**

CMSA-SEC-1: Data visualization using spreadsheet

Theory: 03 Credits: 45 hours

- **Introduction to spreadsheet: (02 hours)**
- **Working with Data and Tables: (02 hours)**
- **Performing Calculations on Data: (02 hours)**
- **Changing Workbook Appearance: (02hours)**
- **Data analysis and Manipulation: (04 hours)**
- **Advanced Spreadsheet features: (04hours)**
- **Statistical functions and analysis: (05 hours)**
- **Pivot tables and data aggregation: (04 hours)**
- **Advanced data visualization: (05hours)**
- **Exploratory data analysis: (04 hours)**
- **Advanced analysis technique: (04 hours)**
- **Reporting and presentation of results: (03 hours)**
- **Collaborating and sharing: (04 hours)**

Practical: 01 Credits: 30 hours

IDC: Fundamental of Computer Science and its application

Credit: 03 Hours: 45

- **Introduction to computer and computing: 08 hours**
- **Data representation and number system: 04 hours**
- **Algorithms and data structure: 06 hours**
- **Office suite: 08 hours**
- **Programming language: 08 hours**
- **Networking: 05hours**
- **Artificial intelligence: 05 hours**
- **ICT (Information and Computations Tools): 01 hours**

Semester-II

CMS-G-CC-2-2-TH: Algorithms& Data Structure

Core Course- 2: Theory: 60 hours

- **Introduction: (04 hours)**

- **Arrays: (10 hours)**
- **Linked List: (16 hours)**
- **Stacks and Queues: (16 hours)**
- **Searching: (04 hours)**
- **Sorting: (10 hours)**

CMS-G-CC-2-2-P: Programming with C

Core Course- 2: Practical: 40 hours

- **Basic Structure**
- **Operators**
- **Branching and Looping:**if, if-else, while, do-while, for.
- **Arrays**
- **User defined functions**
- **Structures**
- **Pointers**
- **File handling**
- **Other Feature**

Semester-III

CMS-G-CC-3-3-TH: Computer Organization

Core Course- 3: Theory: 60 hours

- **Basic Computer Organization (15 hours)**
- **Instruction (02 hours)**
- **Control Unit (05 hours)**
- **ALU (10 hours)**
- **Memory (15 hours)**
- **I/O (08 hours)**
- **Computer Peripherals: (05 hours)**

CMS-G-CC-3-3-P: Programming using Python

Core Course- 3: Practical: 40 hours

Open Source Computer Programming Language Python 3

- **Introduction to the Python (2 hours)**
- **Ordered Datatypes - Strings, Lists and Tuples (6 hours)**
- **Conditionals and Iterators (12 hours)**
- **User-defined Functions and Recursion (10 hours)**
- **File Handling and Exception Handling (5 hours)**
- **Unordered data types - Sets and Dictionaries (5 hours)**

^ Suggested lab exercises

Use Python 3.6 or above. Use a text editor sensitive to whitespace like Notepad++, gedit, vim, Sublime Text, and NOT Notepad / WordPad.

Semester-IV

CMS-G-CC-4-4-TH: Operating Systems

Core Course- 4: Theory: 60 hours

- **System Software (04 hours)**
- **Introduction (08 hours)**

- **Operating System Organization** (02 hours)
- **Process** (18 hours)
- **Deadlock** (09 hours)
- **Memory Management** (14 hours)
- **File and I/O Management** (05 hours)

CMS-G-CC-4-4-P: Shell Programming (Linux)

Core Course- 4: Practical: 40 hours

Semester-V

CMS-G-DSE-A-5-1-TH: Database Management System

Discipline Specific Elective Course – A (DSE-A-1): Choice-1: Theory: 60 hours

Introduction: (12 hours)

ER Model: (12 hours)

Relational Model: (14 hours)

Relational Database Design: (22 hours)

CMS-G-DSE-A-5-1-P: DBMS Lab using SQL

Discipline Specific Elective Course – A (DSE-A-1): Choice-1: Practical: 40 hours

CMS-G-SEC-A-5-2-TH: Software Engineering

Skill Enhancement Course – A (SEC-A-1): Choice-1: Theory: 40 hours

- **Introduction:** (12 hours)
- **Software Requirement and Specification Analysis:** (07 hours)
- **Software Design Analysis:** (12 hours)
- **Software Testing:** (07 hours)
- **Software Quality Assurances:** (02 hours)

Semester-VI

CMS-G-DSE-B-6-3-TH: Computational Mathematics

Discipline Specific Elective Course – B (DSE-B-2): Choice-2: Theory: 60 hours

- **Errors:** (05 hours)
- **Interpolation:** (05 hours)
- **System of Linear Equations:** (10 hours)
- **Solution of Non-linear Equations:** (10 hours)
- **Integration:** (10 hours)
- **Graph Theory: (concept only)** (20 hours)

CMS-G-DSE-B-6-3-P: Computational Mathematics Lab using C

Discipline Specific Elective Course – B (DSE-B-2): Choice-2: Practical: 40 hours

CMS-G-SEC-B-6-1-TH: Multimedia and its Applications

Skill Enhancement Course – B (SEC-B-1): Choice-1: Theory: 40 hours

- **Multimedia System:** (10 hours)
- **Multi-modal Communication:** (10 hours)
- **Multimedia OS:** (20 hours)

ACADEMIC CALENDAR
July 2023-June 2024

DEPARTMENT OF ECONOMICS
BANGABASI MORNING COLLEGE

Course: B.Com, Semester-1 (Hons./ General) July-Dec, 2023

Paper- IDC/MDC: Microeconomics

(Tutorial exam: 25 marks; Semester-end Exam: 50 marks; Total: 75 marks)

| Topic | Teacher | Month |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|-------------|
| Unit-I: Introduction Definition of Microeconomics, Macroeconomics; positive and normative economics—Basic concepts--scarcity and choice; Production Possibility Curve; Central Problem of the Economy; concept of slope | PP, NP | Jul- Aug |
| Unit-II: Theory of Demand and Supply (A) Demand and Supply--Concepts of Demand—derived demand; Demand function—Determinants of demand; Law of Demand & its expectations; Movement along the Demand curve and shift of the Demand curve; Concepts of Supply and Supply function—Law of Supply; Movement along the supply curve and shift of the supply curve; Market equilibrium and Determination of price; Effect of change in the Demand and Supply on Equilibrium price (B) Elasticity of Demand and Supply—Price elasticity of demand; Determinants and Measurement of price elasticity; Relationship between slope and price elasticity of demand; Income elasticity of demand; Cross price Elasticity of Demand; Elasticity of Supply | PP, NP | Aug- Sep |
| Unit-III: Theory of Consumer Behaviour Concept of Utility and Marginal utility—The Law of Diminishing marginal Utility; Cardinal Utility theory—Concept and significance of Consumer Surplus; Consumer's Equilibrium in case of single and two commodities; Concept of Ordinal utility theory—Indifference curve and its properties; Marginal Rate of Substitution; Budget Line and Budget equation; Consumer's Equilibrium | PP, NP | Sep- Oct |
| Unit-IV: Theory of Production and Cost Concept of Production Function—Fixed and Variable inputs; Short run and Long run; Relation among Total, Average and Marginal Product; Law of Variable Proportion; Return to Scale; Isoquants, Isocosts and Producer's equilibrium (Graphical Explanation); Concepts of Economic Cost and Opportunity Cost; Short Run and Long run Cost Functions—Relation among Average Cost, Average Variable Cost and Marginal Cost; Long run Average Cost Curve from Short Run Average Cost curves | BS | Jul- Nov |
| Unit-V: Revenue and Market Definition and different forms of Market—Revenue under Different Market Structure; Relation among Total Revenue, Average revenue and Marginal Revenue; Perfect Competition and Monopoly—Features, Equilibrium of the firm (Short Run and Long Run); Short run supply curve of a firm under perfect competition; Price discrimination under monopoly; concepts and conditions | BS, NP, PP | Nov- Dec |

Course: B.Com, Semester-2 (Hons./ General) Jan-June, 2024

Paper- IDC/MDC: Macroeconomics

(Tutorial exam: 25 marks; Semester-end Exam: 50 marks; Total: 75 marks)

| Topic | Teacher | Month |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|-------------|
| Unit-I: Basic Concepts Macroeconomics, Concepts, Scope, macroeconomic variables, objectives, differences with microeconomics. | PP | Jul- Sep |
| Unit-II: National Income National income accounting, Concepts and measurement of GDP, GNP, NNP, NDP, PI, DPI, Circular flow of income (2 sectors & 3 sectors economy), Real and Nominal GDP and GDP Deflator. | PP | Jul- Sep |
| Unit-III: Determination of equilibrium income in Simple Keynesian Model Theory of Income determination-Simple Keynesian model; Consumption, Saving, Investment functions; National Income determination; Investment multiplier, Government expenditure multiplier (Graphical Analysis), Tax multiplier and Balanced budget multiplier (concepts). | NP | Jul- Sep |
| Unit-IV: Money and Inflation Concept of demand for money and supply of money, Measures of supply of money, High powered money, money multiplier, Concept of Inflation, Demand pull and Cost push Inflation. Inflationary gap. Monetary and fiscal measures to control inflation. | BS | Jul- Sep |
| Unit-V: Public Finance Government budget—meaning and components, Classifications of receipts—revenue and capital receipts; Classification of expenditure—revenue and capital expenditure. Measures of Government deficit—Revenue deficit, Fiscal deficit, Primary deficit. | BS, NP, PP | Oct-Dec |

Course: B.Com, Semester-3 (Hons) July-Dec, 2023

CC 3.2 Ch....Indian Financial System

(Internal Assessment: 20 marks; Semester-end Exam: 80 marks; Total: 100 marks)

| Topic | Teacher | Month |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|---------|
| Unit-I: Financial System and Its Components Meaning, Significance and Role of the Financial System; Components of the Financial System; The structure of Indian Financial System. [L-10/ Marks: 10] | PP | Jul-Aug |
| Unit-II: Financial Markets (a) Money Market: Functions and Instruments; Role of Central Bank; Indian Money Market: An Overview, Call Money Market, Treasury Bills Market, Commercial Paper (CP) Market, Certificate of Deposit (CD) Market; Concepts— Repo, Reverse Repo; Recent trends in the Indian money market. [L-10/ Marks 10] (b) Capital Market: Functions and Instruments; Primary and Secondary Markets- Functions and inter-relationship, Methods of New Issues; Indian debt market and equity market; Market Intermediaries- Brokers, Sub-Brokers; Role of Stock Exchanges in India; Recent trends in the Indian capital market. [L-20/ Marks: 20] | PP | Aug-Sep |
| Unit-III: Financial Institutions Commercial banking: Functions of Commercial Banks, Credit creation by commercial banks and its limitations; Reserve bank of India: Functions, Credit Control and Monetary Policy; Development Financial Institutions in India: NABARD, EXIM Bank, SIDBI; Life Insurance and General Insurance Companies in India: Functions; Mutual Funds: Concept of Mutual Fund, Types of Mutual Funds (open ended and close ended); Role of Mutual Funds in Indian capital market; Non-Banking Financial Companies (NBFCs): Definition, Functions, Regulations of RBI over NBFCs. [L-20/ Marks: 20] | PP | Oct-Nov |
| Unit-IV: Financial Services Merchant Banks: Functions and Role, SEBI Regulations; Credit Rating: Objectives and Limitations, SEBI Regulations; Credit Rating Institutions and their functions. [L-10/ Marks: 10] | PP | Nov-Dec |
| Unit-V: Investors' Protection Concept of investors' protection; Grievances regarding new issue market and Stock Exchange transactions, and the Grievance Redressal Mechanism; Role of SEBI, judiciary and the media. [L-10/ Marks: 10] | PP | Dec |

Course: B.Com, Semester-4 (Hons./ General) Jan-June, 2024

Paper- GE 4.1 Chg Microeconomics II & Indian Economy

(Internal Assessment: 20 marks; Semester-end Exam: 80 marks; Total: 100 marks

Module I: Microeconomics II

| Topic | Teacher | Month |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|---------|
| Unit-I: Monopoly Concept of Monopoly: Sources of monopoly power; Short-run and Long-run equilibrium of a monopoly firm; Price discrimination; Social Cost of Monopoly (concept only). [L-10/Marks: 10] | NP | Jan-Feb |
| Unit-II: Imperfect Competition Concept of Imperfectly Competitive market; Monopolistic Competition: Features and examples; Oligopoly: Non-Collusive Oligopoly: Sweezy's Kinked demand Curve Model, Collusive Oligopoly: Cartel (concept with example). [L-15/ Marks: 15] | NP | Feb-Mar |
| Unit: III Factor Price Determination Introduction; Marginal Productivity Theory of Distribution; Marginal Productivity Theory of Wage, Demand Curve of Labour, Supply Curve of Labour; Wage Determination in an Imperfectly Competitive Labour Market: Case of Collective Bargaining, Factors determining the power of trade unions to raise wages; Theory of Rent: Ricardian Theory of Rent, Modern Theory of Rent, Quasi-rent; Theory of Profit: Gross Profit and Net Profit, Accounting Profit and Normal Profit, Different Theories of Determination of Profit; Concept of Interest: Gross Interest and Net Interest, Classic Theory of Interest Rate Determination. [L-15/ Marks: 15] | BS | Feb-May |

Module II: Indian Economy

| Topic | Teacher | Month |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|---------|
| Unit-I: Basic Issues in Economic Development Concepts and measures of development and underdevelopment; Concept of national income: GDP, GNP, NDP, NNP, NI (concepts only). [L 5/ Marks: 5] | PP | Jan |
| Unit-II: Basic Features of Indian Economy Sectoral distribution of National Income and Occupational Structure; Structural Change in Indian Economy, issue of Service-led Growth. [L 10/ Marks: 10] | PP | Feb |
| Unit-III: Sectoral Trends and Issues (a) Agricultural Sector: Problem of low productivity; Green Revolution and its impact; Land Reforms; Problems of rural credit and marketing. (b) Industry and Service Sector: An overview of industrial growth during pre-reform and post-reform period; Role of Public Sector: its performance and the issue of disinvestment; Role of MSME sector, problems faced by the MSME Sector; Role of the Service Sector: growth of banking and insurance sector during the post-reform period. (c) External Sector: Problem of unfavourable balance of payments and policy measures. [L 15/ Marks: 15] | PP | Mar-Apr |
| Unit-IV: Social Issues in Indian Economy Problem of Poverty, Poverty alleviation measures; Problem of Unemployment and the policy Measure. [L 10/ Marks: 10] | PP | Apr-May |

Course: B.Com, Semester-5 (Hons.) July-Dec, 2023

DSE 5.1 A: Economics II & Advanced Business Mathematics

Module I: Economics II/ Macroeconomics

(Internal Assessment: 10 marks; Semester-end Exam: 40 marks; Total: 50 marks)

| Topic | Teacher | Month |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|-------------|
| Unit-I: Introduction Concepts and variables of Macroeconomics. [L 2 / Marks: 2] | BS/NP | Jul |
| Unit-II: National Income Accounting Concepts and measurement of National Income (numerical examples preferred); Circular flow of income – Real and Nominal GDP –Implicit deflator. [L 6 / Marks: 6] | BS/NP | Aug |
| Unit – III: Determination of Equilibrium Level of National Income Simple Keynesian Model; Consumption, saving and investment functions – National income determination; Investment multiplier, Government expenditure multiplier, Tax multiplier, Balanced Budget multiplier. [L 10 / Marks: 10] | BS/NP | Sep |
| Unit-IV: Commodity market and Money market equilibrium Concept of demand for Money: Liquidity Preference Approach; Derivation of IS and LM curves –Shifts of IS and LM curves—equilibrium in IS-LM model – Effectiveness of monetary and fiscal policies. [L 10 / Marks: 10] | BS/NP | Oct- Nov |
| Unit-V: Money, Inflation and Unemployment Concept of supply of money; Measures of money supply – High powered money – Money multiplier. Concept of Inflation– Demand-pull and Cost-push theories of inflation – Monetary and fiscal policies to control inflation; Unemployment: Voluntary and Involuntary, Frictional and Natural Rate of Unemployment (Concepts only). [L 12 / Marks: 12] | BS/NP | Nov- Dec |

Course: B.A/ B.Sc, Semester-1 (General) July-Dec, 2023

Paper- ECON-MD-CC1

Name of the Course: Microeconomics (I)

Total Marks: 100 [Theory 75 + Tutorial 25]

| Topic | Teacher | Month |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|---------|
| Unit 1: Exploring the subject matter of Economics 5 lecture hours 1.1 Scope and Method of Economics: Wants, Scarcity, Competing Ends and Choice - Defining Economics, Thinking like an economist: Basic Economics Questions, Households and firms, Demand and Supply, Basic concepts of Utility, basic concepts of production-Production function, Definition of Average and Marginal Product, Microeconomics and Macroeconomics, Normative Economics and Positive Economics 1.2 Principles of Microeconomics—principles of individual decision making and principles of economic interactions—trade off, opportunity cost, efficiency, marginal changes and cost-benefit, trade, market economy, property rights, market failure, externality and market power. 1.3 Interdependence and the Gains from Trade- production possibilities frontier and increasing costs, absolute and comparative advantage, comparative advantage and gains from trade. | PP | Jul-Aug |
| Unit 2: Utility Theory 20 lecture hours <i>(Focus on intuitive explanation and diagrams. Learning to analyze without using calculus a must)</i> 2.1 Cardinal and Ordinal Approach. 2.2 Utility in Cardinal Approach- Utility and choice, Total Utility and Marginal Utility, Utility and choice maximization, marginal utility, theory of demand 2.3 Ordinal utility: Assumptions on preference ordering, Indifference curve (IC), Marginal rate of substitution and convexity of IC, Budget constraint, Consumers equilibrium—interior and corner | NP | Jul-Oct |
| Unit 3: Demand and Supply: How Markets Work 8 lecture hours 3.1 Elementary theory of Demand: Factors influencing household demand and market demand, the demand curve, movement along and shift of the demand curve 3.2 Elementary theory of Supply: factors influencing supply, the supply curve, movement along and shift of the supply curve 3.3 The Elementary theory of market price: Determination of equilibrium price in a competitive market. | PP | Sep-Oct |
| Unit 4: Market and Adjustments 4 lecture hours 4.1 The Evolution of Market Economies, Price System and the Invisible Hand 4.2 The Decision-takers - households, firms and central authorities 4.3 The Concepts of Markets- individual market, separation of individual markets, interlinking of individual markets. Difference among markets- competitiveness, goods and factor markets, free and controlled markets. Market and non-market sectors, public and private sectors, economies- free market, command and mixed. 4.4 Different goods: Public goods, Private goods, Common resources and Natural Monopolies. | BS | Jul-Sep |
| Unit 5: Market Sensitivity and Elasticity 8 lecture hours 5.1 Importance of Elasticity in Choice-Decisions 5.2 Method of Calculation- Arc Elasticity, Point Elasticity-definition 5.3 Demand and supply Elasticities—types of elasticity and factors affecting elasticity, Demand Elasticity and Revenue, Long run and Short run elasticities of Demand and Supply 5.4 Income and Cross Price Elasticity 5.5 Applications: Case studies—OPEC and Oil Price | BS | Oct |

Mode of tutorial Examination: Viva or Presentation plus viva

Course: B.A/ B.Sc, Semester-2 (General) Jan- June, 2024

Paper- ECON-MD-CC2

Name of the Course: Macroeconomics (I)

Total Marks: 100 [Theory 75 + Tutorial 25]

| Topic | Teacher | Month |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|---------|
| 1.National Income Accounting Lecture hours 12 1.1 Macroeconomic data- Basic concepts of National Income accounting. The circular flow (three sector). 1.2 Concepts of GNP, GDP, NNP, and NDP at market price and at factor cost- Real and Nominal, - Implicit deflator. 1.3 The measurement of National Income. The problem of double counting. 1.4 The role of Government. Concepts of Corporate Income, Corporate Savings, Personal Income, Personal Disposable Income and Personal Savings. 1.5 Saving-Investment gap and its relation with budget deficit and trade surplus. National Income accounting and cost of living. | PP | Jan-Mar |
| 2. Income Determination in the Short Run (Part-I): The Simple Keynesian Model in a Closed Economy Lecture hours 12 2.1 Consumption Function; the Keynesian Saving Function; stability of equilibrium; the concept of effective demand- the concept of demand-determined output 2.2 Equilibrium Income determination in SKM; the Simple Keynesian Multiplier ; the paradox of thrift; the SKM in a Closed Economy with Government; Government expenditure and Tax 2.3 Balanced Budget Multiplier | NP | Jan-Mar |
| 3. Basic theory of Investment Lecture hour 3 3.1 Investment function: Determinants of investment. Concepts of Marginal productivity of capital 3.2 Marginal efficiency of capital (MEC) and Marginal efficiency of investment (MEI). | PP | Mar-Apr |
| 4. The Classical system Lecture hours 12 4.1 Basic ideas of Classical Macroeconomics; Say's Law and Quantity Theory of Money 4.2 Loanable fund theory 4.3 The Classical Theory of Income and Employment determination 4.4 Full Employment and wage-price flexibility; Neutrality of Money 4.5 Classical Dichotomy (Basic Concept). | BS | Jan-Mar |
| 5. Inflation Lecture hours 6 5.1 Concepts and types - Inflationary Gap, Demand pull vs. Cost push inflation, 5.2 Anti-inflationary policy | BS | Apr |

Mode of tutorial Examination: Viva or Presentation plus viva

Course: B.A/ B.Sc, Semester-3 (General) July-Dec, 2023

Core Course 3 (CC 3) BA/BSc (General) / Generic Elective Course III (GE-III) for BA/BSc (Hons)

Paper- ECO-G-CC-3-3-TH-TU/ ECO--GE-3-3-TH-TU

Name of the Course: Issues in Economic Development and India

Total Marks: 100 [Theory 65 + Tutorial 15 + Internal Assessment 10 + Attendance 10]

| Topic | Teacher | Month |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|---------|
| 1. Meaning of Economic Development Meaning of economic development; growth vs. development; concept of human development and its measurement, population and human development; education and health sectors in India; features and causes of underdevelopment of the Indian economy; growth and development of Indian economy under different policy regimes. | 25 lecture hours BS | Jul-Aug |
| 2. Poverty , Inequality and Development Basic issues of poverty and inequality; basic ideas about measurement of poverty and inequality- the poverty line; trends and policies to eradicate poverty and income inequality in India | 20 lecture hours NP | Aug-Sep |
| 3. Development of the Dual Economy and Development Strategies • Surplus labour and disguised unemployment-basic concepts; the Lewis model of economic development with unlimited supply of labour. • Balanced and unbalanced growth as development strategies | 15 lecture hours PP | Sep-Oct |
| 4. International Organizations and Economic Development • Functions of IMF and World Bank and their roles in economic development • The World Trade Organization (WTO) and its functions. India and the WTO | 15 lecture hours BS/NP | Nov-Dec |

Course: B.A/ B.Sc, Semester-4 (General) Jan-June, 2024

Core Course 4 (CC 4) BA/BSc (General) / Generic Elective Course IV (GE-IV) for BA/BSc (Hons)

Paper-ECO-G-CC-4-4-TH-TU/ ECO--GE-4-4-TH-TU

Name of the Course: Indian Economic Policies

Total Marks: 100 [Theory 65 + Tutorial 15 + Internal Assessment 10 + Attendance 10]

| Topic | Teacher | Month |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|---------|
| 1. Macroeconomic Policies and their Impact Fiscal Policy; trade and investment policy; financial and monetary policies; labour regulation. | 15 lecture hours BS/NP | Jan-Feb |
| 2. Policies and Performance in Agriculture Growth; productivity; agrarian structure and technology; capital formation; trade; pricing and procurement. | 21 lecture hours BS/NP | Feb-Mar |
| 3. Policies and Performance in Industry Growth; productivity; diversification; small scale industries; public sector; competition policy; foreign investment | 21 lecture hours BS/NP | Mar-Apr |
| 4. Policies and Performance of Indian Foreign Trade India's foreign trade: change in volume and direction of India's foreign trade in the post-liberalization period; Balance of Payments position of India in recent years; India's export and import policies. | 18 lecture hours PP | Apr-May |

Course: B.A/ B.Sc, Semester-3/5 (General) July-Dec, 2023
Skill Enhancement Course [Economics] -A Group (SEC-A) BA/BSc (General)
Paper: ECO-G-SEC-3-1A-TH/ECO-G-SEC-5-2A-TH
Name of the Course: Elementary Rural Development (ERD)
Total Marks: 100 [Theory 80 + Internal Assessment 10 + Attendance 10]

| Topic | Teacher | Month |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|---------|
| 1. Basic Issues in Rural Development • Rural Development vs. Agricultural Development • Decentralized Planning and Participatory Development-the role of Panchayats • Panchayat and Rural Development in West Bengal • Role of NGOs in Rural Development | 12 lecture hours BS | Jul-Nov |
| 2. Rural Credit and Self Help Groups (SHGs) • Constraints of micro-enterprises in rural areas • The rural non-farm sector –credit needs for rural non-farm sector. • Concept of micro credit and the role of Grameen Bank • Need for SHG for formation-features of SHG • SHGs in India | 12 lecture hours NP | Jul-Nov |
| 3. Selected Government Programmes and Rural Development • Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) • Mid-day Meal • Pradhan Mantri Gram Sadak Yojana (PMGSY) | 6 lecture hours PP | Jul-Nov |

Course: B.A/ B.Sc, Semester-4/6 (General) Jan-June, 2024
Skill Enhancement Course [Economics] -B -Group (SEC-B) BA/BSc (General)
Name of the Course: Entrepreneurship and Development (ED)
Paper: ECO-G-SEC-4-1B-TH/ECO-G-SEC-6-2B-TH
Total Marks: 100 [Theory 80 + Internal Assessment 10 + Attendance 10]

| Topic | Teacher | Month |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|---------|
| 1. Basic issues of Entrepreneurship and Economic Development • Basic features of Entrepreneurship • Entrepreneurship and its linkages with economic development • Growth of entrepreneurship in India—Role of Entrepreneurship in Economic Development. • Planning Commission’s guidelines for formulating a project report by an entrepreneur • Problem of Rural entrepreneurship in India | 10 lecture hours NP | Jan-May |
| 2. Financial resources for new ventures of an entrepreneur • Sources of finance---capital structure. • Institutional support to enterprises—national small industries board – state small industries development corporation--- district industries center--- industrial estates-Indian experience | 7 lecture hours BS | Jan-May |
| 3. Growth strategies in small business • Stages of growth, • Types of growth strategies-Expansion, Diversification, Joint Venture, Merger and Subcontracting | 7 lecture hours BS/NP /PP | Jan-May |
| 4. Sickness in Small Business • Concept of industrial sickness • Symptoms of sickness in small business • Causes and consequences of sickness in small business | 6 lecture hours PP | Jan-May |

Course: B.A/ B.Sc, Semester-5 (General) July-Dec, 2023
Discipline Specific Elective Course [Economics] (DSE-A) BA/BSc (General)
Name of the Course: Sustainable Development (SD)

Paper: ECO-G-DSE-5-1A/2A-TH-TU

Total Marks: 100 [Theory 65 + Tutorial 15 + Internal Assessment 10+Attendance 10]

| Topic | Teacher | Month |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|---------|
| 1. The Approach Towards Sustainability-Introductory ideas 15 lecture hours Key environmental issues and problems, economic way of thinking about these problems, circular flow of environmental pollutants and waste recycling-laws of thermodynamics, renewable and non-renewable resources-the issue of sustainability | BS | Jul-Nov |
| 2. The meaning of Sustainable Development 25 lecture hours Different definitions of sustainable development, rules of sustainable development, measures of sustainable development, sustainable management of resources-the role of property rights, stakeholders associated with sustainable management of different types of renewable resources fishery, forestry and water, the concept of sustainable livelihood in the context of sustainable resource management. | NP | Jul-Nov |
| 3. Trans-boundary pollution, climate change and sustainable development 15 lecture hours Implementation of environmental policies in developing countries and international experience; transboundary environmental problems-international meetings, protocols and treaties; economics of climate change-basic ideas of the carbon credit market-clean development mechanism and international emission trading. | PP | Jul-Nov |
| 4. Sustainable Resource Management Policies in India 20 lecture hours Water policy, forestry policy and fishery policy of India. Basic objectives of the policies along with goals and visions. | BS/PP /NP | Jul-Nov |

Course: B.A/ B.Sc, Semester-6 (General) Jan-June, 2024
Discipline Specific Elective Course [Economics] (DSE-B) BA/BSc (General)
Name of the Course: Economic History of India (1857-1947) (EHI)

Paper: ECO-G-DSE-6-1B/2B-TH-TU

Total Marks: 100 [Theory 65+ Tutorial 15 + Internal Assessment 10+Attendance 10]

| Topic | Teacher | Month |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|---------|
| 1. Colonial India: Background and Introduction 10 lecture hours Overview of the colonial economy | PP | Jan-May |
| 2. Macro Trends 13 lecture hours National Income; population; occupational structure. | BS | Jan-May |
| 3. Agriculture 17 lecture hours Agrarian structure and land relations; agricultural markets and institutions – credit, commerce and technology; trends in performance and productivity; famines. | NP | Jan-May |
| 4. Railways and Industry 20 lecture hours Railways; the de-industrialisation debate; evolution of entrepreneurial and industrial structure; nature of industrialisation in the interwar period; constraints to industrial breakthrough; labour relations. | BS/PP | Jan-May |
| 5. Economy and State in the Imperial Context 15 lecture hours The imperial priorities and the Indian economy; drain of wealth; international trade, capital flows and the colonial economy – changes and continuities; government and fiscal policy. | NP/PP | Jan-May |

This is a tentative distribution for successful completion of the syllabus. The Department, although has responsibility towards the successful completion of the syllabus, however, holds that the distribution of Month and syllabus is subject to modification under unavoidable circumstances within the bounded time-frame.

ACADEMIC CALENDER 2023 - 2024

JULY - DECEMBER

GEOGRAPHY GENERAL (THEORY)

SEMESTER – 1/3 (for H & MD)

GEOG-H-CC01/MD-CC01-1/3-Th-Physical Geography – 75 Marks / 3 Credits

| UNIT | TOPIC | TEACHER | PERIOD |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------|---------|-----------|
| 1 | Cartography : Concept and applications of scale and projections:Components and classification of maps | RR | AUGUST |
| 2 | Geotectonics : Seismic waves and internal structure of the earth | AD | AUGUST |
| 3 | Geomorphology : 1. Classification of weathering and agents of erosion. 2. Fluvial processes and landforms | RR | SEPTEMBER |
| 4 | Climatology : 1. Nature,composition,and layering of the atmosphere. 2. Circulation in the atmosphere :Planetary wind,jet streams and index cycle | AD | SEPTEMBER |
| 5 | Soil Geography : Factors of soil formation, evolution of an soil profile | RR | OCTOBER |
| 6 | Biogeography : Plant adaptation and distribution in relation to water availability | AD | OCTOBER |
| 7 | Geography of Hazards : Nature and classification of Hazards and disasters in indian context. | AD | NOVEMBER |

GEOG-H-CC01/MD-CC01-1/3-P- Physical Geography Lab – 25Marks/ 1 Credit

| SL NO. | TOPIC | TEACHER | PERIOD |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|---------|
| 1 | Graphical construction of scales : Plain,Comparative,Diagonal and Vernier | RR | AUG-SEP |
| 2 | Delineation of drainage basins on Survey of India 1:50k topographical maps.Determining stream ordering (Strahler),and bifurcation ratio in a drainage basin (c.5' x 5') | AD | AUG-SEP |
| 3 | Identification of drainage and channel patterns from survey of india 1:50k topographical maps | RR | OCT-NOV |
| 4 | Construction and interpretation of wind rose diagram | AD | OCT-NOV |
| 5 | Viva voce based on laboratory notebook | RR & AD | AUG-NOV |

SEMESTER III

GEO-G-CC-3-03-TH – HUMAN GEOGRAPHY (60 MARKS / 4 CREDITS)

| TOPIC | TEACHER | PERIOD |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|---------------|
| <u>UNIT I: ECONOMIC GEOGRAPHY</u> 1. SECTORS OF ECONOMY: PRIMARY, SECONDARY, TERTIARY, AND QUATERNARY. FACTORS AFFECTING LOCATION OF ECONOMIC ACTIVITIES 2. LOCATION OF ECONOMIC ACTIVITIES: THEORIES OF VON-THUNEN, LOSH, WEBER 3. LOACTION OF INDUSTRIES WITH SPECIAL REFERENCE TO INDIA: CCOTTON, IRON AND STEEL 4. GLOLALISATION AND INTERGRATION OF WORLD ECONOMIES | RR | SEP-NOV |
| <u>UNIT II: SOCIAL GEOGRAPHY</u> 5. HUMAN SOCIETY: STRUCTURE, FUNCTIONS, SOCIAL SYSTEMS. POPULATION AND MIGRATION: OVERVIEW, CAUSES AND AFFECTS 6. TYPES AND CHARACTERISTICS OF SOCIAL ORGANISATIONS: PRIMITIVE, HUNTING-GATHERING, AGRARIAN, INDUSTRIAL 7. RACE, LANGUAGE AND RELIGION: ORIGIN, CHARACTERISRICS AND SPACIAL VARIATIONS 8. SOCIAL ISSUES: DIVERSITY, CONFLICT AND TRANSFORMATION | AD | SEP-OCT |
| <u>UNIT III: CULTURAL GEOGRAPHY</u> 1. CARL SAUER: CULTURAL LANDSCAPE AND ITS ELEMENTS 2. RURAL AND URBAN SETTLEMENTS: DIFFERENTIATION IN CULTURAL LANDSCAPES 3. CULTURAL REGIONS AND CULTURAL REALMS 4. DIFFUSION OF CULTURE AND INNOVATIONS | AD | OCT-NOV |

GEO-G-CC-3-03-P – HUMAN GEOGRAPHY LAB (30 MARKS / 2 CREDITS)

| TOPIC | TEACHER | PERIOD |
|--------------------------------------------------------------------------------------------------------------------------------------------|---------|-----------|
| 1. STATE-WISE VARIATION IN OCCUPATIONAL STRUCTURE BY PROPORTIONAL DIVIDED CIRCLES | AD | SEP - OCT |
| 2. TIME SERIES ANALYSIS OF INDUSTRIAL PRODUCTION USING ANY TWO MANUFACTURED GOODS FROM INDIA | AD | NOV |
| 3. MEASURING ARITHMETIC GROWTH RATE OF POPULATION OF DEVELOPED AND DEVELOPING COUNTRIES COMPARING TWO DATASETS OF 2 DECADES OF 2 COUNTRIES | RR | SEP - OCT |
| 4. NEAREST NEIGHBOUR ANALYSIS: RURAL EXAMPLE FROM SURVEY OF INDIA 1:50K TOPOGRAPHICAL MAPS . | RR | NOV |
| 5. VICE-VOCE BASED ON LABORATORY NOTEBOOK | AD & RR | SEP-NOV |

GEO-G-SEC-A-3/4-01-TH – COASTAL MANAGEMENT (90 MARKS / 2 CREDITS)

| TOPIC | TEACHER | PERIOD |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|-----------|
| COMPONENTS OF COASTAL ZONE: COASTAL MORPHODYNAMIC VARIABLES AND THEIR ROLE IN EVOLUTION OF COASTAL FORMS | RR | SEP - OCT |
| ENVIRONMENTAL IMPACTS AND MANAGEMENT OF MINING, OIL EXPLORATION,SALT MANUFACTURING, LND RECLAMATION AND TOURISM | RR | NOV |
| COASTAL HAZARDS AND THEIR MANAGEMENT USING SRUCTURAL AND NON STRUCTUTAL MEASURES: EROSION, FLOOD,SAND ENCROACHMENT, DUNE DEGRADATION,ESTURINE SEDIMENTATION AND POLLUTION | AD | SEP - OCT |
| PRINCIPLES OF COASTAL ZONE MANAGEMENT. EXCLUSIVE ECONOMIC ZONEAND COASTAL REGULATION ZONE WITH REFERENCE TO INDIA | AD | NOV |

SEMESTER – V

GEO-G-DSE-A-5-01-TH-REGIONAL DEVELOPMENT (60MARKS/4 CREDITS)

| SL NO. | TOPIC | TEACHER | PERIOD |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------|---------|--------|
| 1 | DEFINITION OF REGION: TYPES AND NEED OF REGIONAL PLANNING. | RR | SEP |
| 2 | CHOICE OF REGION FOR PLANNING: CHARACTERISTICS OF IDEAL PLANNING REGION; DELINIATION OF PLANNING REGION. | RR | SEP |
| 3 | REGIONALIZATION OF INDIA FOR PLANNING (AGRO-ECOLOGICAL ZONES). | RR | OCT |
| 4 | STATEGIES/MODELS FOR REGIONAL PLANNING: GROWTH POLE MODEL OF PERROUX. | RR | NOV |
| 5 | GROWTH CENTRE MODEL IN INDIAN CONTEXT; CONCEPT OF VILLAGE CLUSTER. | RR | NOV |
| 6 | PROBLEM REGIONS AND REGIONAL PLANNING; BACKWARD REGIONS AND REGIONAL PLANS: SPECIAL AREA PLANS IN INDIA. DVC: SUCCESS AND FAILURE. | RR | NOV |
| 7 | CHANGING CONCEPT OF DEVELOPMENT AND UNDERDEVELOPMENT; EFFICIENCY-EQUITY DATA BASED. | AD | SEP |
| 8 | INDICATORS OF DEVELOPMENT: ECONOMIC, SOCIAL AND ENVIRONMENTAL. CONCEPTS OF HUMAN DEVELOPMENT. | AD | SEP |
| 9 | REGIONAL DEVELOPMENT IN INDIA, REGIONAL INEQUALITY, DISPARITY AND DIVERSITY. | AD | OCT |
| 10 | DEVELOPMENT AND REGIONAL DISPARITIES IN INDIA SINCE INDEPENDENCE: DISPARITIES IN AGRICULTURAL DEVELOPMENT. | AD | NOV |
| 11 | DEVELOPMENT AND REGIONAL DISPARITIES IN INDIA SINCE INDEPENDENCE: DISPARITIES IN INDUSTRIAL DEVELOPMENT. | AD | NOV |
| 12 | DEVELOPMENT AND REGIONAL DISPARITIES IN INDIA SINCE INDEPENDENCE: DISPARITIES IN HUMAN RESOURCE DEVELOPMENT IN TERMS OF EDUCATION AND HEALTH. | AD | NOV |

GEO-G-DSE-A-5-01-P-REGIONAL DEVELOPMENT LAB(30 MARKS/2 CREDITS)

| SL NO. | TOPIC | TEACHER | PERIOD |
|---------------|--------------------------------------------------------------------------|----------------|---------------|
| 1 | DELINIATION OF REGIONS ACCORDING TO GIVEN CRITERIA USING WEAVER'S METHOD | RR | SEP - OCT |
| 2 | DETERMINATION OF SPHERE OF INFLUNCE BY GRAVITY MODEL | RR | NOV |
| 3 | MEASUREMENT OF INEQALITY BY LORENZ CURVE AND LOCATION QUOTIENT | AD | SEP - OCT |
| 4 | PREPARATION OF Z SCORE AND COMPOSITE INDEX FROM SUITABLE DATA | AD | NOV |
| 5 | VIVA VOCE BASED ON LABORATORY NOTE BOOK | AD+RR | SEP - NOV |

GEO-G-SEC-A-3/5-02-TH- FOREST AND WILDLIFE MANAGEMENT (90 MARKS/2 CREDITS)

| SL NO | TOPIC | TEACHER | PERIOD |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|---------------|
| 1 | FOREST AND WILDLIFE MANAGEMENT: IMPORTANCE AND STRATEGIES. ROLE AND SIGNIFICANCE OF STAKEHOLDERS. TANGIBLE AND INTANGIBLE BENEFITSOF FOREST AND WILDLIFE MANAGEMENT. | RR | SEP - OCT |
| 2 | LEGAL FRAMEWORK OF FOREST AND WILDLIFE PROTECTION IN INDIA. THE INDIAN FOREST ACT 1927,FOREST CONSERVATION ACT 1980, WILDLIFE PROTECTION ACT1972,BIODIVERSIY ACT 2002 | AD | SEP - OCT |
| 3 | FOREST AS COMMON PROPERTY RESOURCES. FOREST RIGTS: TRIBALS AND FORSTS. GENDER DIMENTIONOF FOREST MANAGEMENT. MANAGEMENT OF POACHING AND ILLEGAL LOGGING. | RR | NOV |
| 4 | PRINCIPLES OF COMMUNITY PARTICIPATION AND JOINT FOREST MANAGEMENT. CAUSES AND MANAGEMENT OF HUMAN WILDLIFE CONFLICTS WITH SPECIAL REFERENCE TO JANGAL MAHAL, SUNDARBAN, DUARS. | AD | NOV |

SEMESTER – 2/4 (for H&MD)

GEOG-H-CC02/MD-CC02-2/4Th – Physical Geography – 75Marks/3 Credits

| UNIT | TOPIC | TEACHER | PERIOD |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|----------|
| 1 | Scope and Approaches : 1.Elements of human geography : Nature,scope and recent trends 2.Human geography schools of thought: Resource,locational,landscape,envieionment | RR | JANUARY |
| 2 | Social Geography : 1.Evolution of human societies: Hunting and food gathering,pastoral nomadism,subsistence farming and industrial society 2.Human adaptation to the environment : Chenchu ,Toda, and Gond 3.Evolution and characteristics of post-industrial urban societies | AD | JAN-FEB |
| 3 | Population Geography : 1.Demographic transition. Significance of demographic dividend 2.Distribution,density, and growth of population in india | RR | FEBRUARY |
| 4 | Settlement Geography : 1.Characteristics of settlements : Urban and rural 2.Site, situation,types and patterns of rural settlements | RR | MARCH |
| 5 | Urban Geography : Size-class classification of urban settlements after Census of India | AD | MARCH |

GEOG-H-CC02/MD-CC02-2/4-P- Human Geography Lab – 25 Marks/1 Credit

| SL NO. | TOPIC | TEACHER | PERIOD |
|--------|------------------------------------------------------------------------------------------------------------------------|---------|---------|
| 1 | Growth rate of population : Arithmetic growth comparing two decadal datasets | RR | JAN-FEB |
| 2 | Representation and interpretation of population density of indian states or West Bengal districts by Choropleth method | RR | MAR-APR |
| 3 | Identification of types of settlements according to sites from Survey of India 1:50k topographical maps | AD | JAN-FEB |
| 4 | Construction of proportional squares depicting number of houses | AD | MAR-APR |
| 5 | viva voce based on laboratory notebook | RR & AD | JAN-MAY |

SEMESTER IV

GEO-G-CC-4-04-TH – CARTOGRAPHY (60 MARKS / 4 CREDITS)

| TOPIC | TEACHER | PERIOD |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|------------------|
| <p><u>UNIT I: SCALES AND PROJECTIONS</u></p> <p>1. MAPS: CLASSIFICATION AND TYPES. SCALES : TYPES SIGNIFICANCE AND APPLICATIONS</p> <p>2. COORDINATE SYSTEMS: POLAR AND RECTANGULAR. BEARING:MAGNETIC AND TRUE, WHOLE-CIRCLE AND REDUCED</p> <p>3. MAP PROJECTIONS: CLASSIFICATION, PRPERTIES AND USES. CONCEPT AND SIGNIFICANCE OF UTM PROJECTION</p> | RR | JAN- FEB- MAR |
| <p><u>UNIT II: TOPOGRAPHIC AND THEMATIC MAPS</u></p> <p>4. SURVEY OF INDIAN TOPOGRAPHIC MAPS: REFERENCE SCHEME OF OLD AND OPEN SERIES. INFORMATION ON THE MARGIN OF MAPS</p> <p>5. REPRESENTATION OF DATA BY DOTS AND PROPORTIONAL CIRCLES</p> <p>6. REPRESENTATION OF DATA BY ISOPLETH AND CHOROPLETH</p> <p>7. PRINCIPAL NATIONAL AGENCIES PRODUCING THEMATIC MAPS IN INDIA: GSI,NBSSLUP,NHO,NRSC, ETC. ACQUINTANCE WITH BHUVAN PLATFORM</p> | AD | JAN- FEB- MAR |
| <p><u>UNIT III: REMOTE SENSING AND GEOGRAPHICAL INFORMATION SYSTEM</u></p> <p>8. BASICS OF REMOTE SENSING: TYPES OF SATELLITE , SENSORS, BANDS AND RESOLUTIONS WITH SPECIAL REFERNCE TO THE ISRO MISSIONS</p> <p>9. PRINCIPLES OF PREPARING STANDARD FCC AND CLASSIFIED RASTER IMAGES</p> <p>10. PRINCIPLES OF GEOGRAPHICAL INFORMATION SYSTEM: CONCEPTS OF VECTOR TYPES, ATTRIBUTE TABLES,BUFFERS AND OVERLAY ANALYSIS</p> | AD | MAR- APR-MAY |
| <p><u>UNIT IV:SURVEYING</u></p> <p>11. BASIC CONCEPTS OF SURVEYING AND SURVEY EQIPMENTS: PRISMATIC COMPASS</p> <p>12. BASIC CONCEPTS OF SURVEYING AND SURVEY EQIPMENTS: DUMPY LEVEL</p> | RR | MAR- APR-MAY |

GEO-G-CC-4-04-P – CARTOGRAPHY (30 MARKS / 2 CREDITS)

| SL NO. | TOPIC | TEACHER | PERIOD |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------|----------------|---------------|
| 1. | GRAPHICAL CONSTRUCTION OF SCALES: PLAIN AND COMPARATIVE | RR | JAN-FEB |
| 2. | CONSTRUCTION OF PROJECTIONS:SIMPLE CONICAL WITH ONE STANDARD PARALLEL, CYLINDRICAL EQUAL AREA PROJECTION AND POLAR ZENITHAL STEREOGRAPHIC | RR | MAR-APR |
| 3. | CONSTRUCTION OF THEMATIC MAPS: PROPORTIONAL SQUARES, PROPOTIONAL CIRCLES, CHOROPLETHS AND ISOPLETHS | AD | JAN-FEB |
| 4. | PREPARATION OF ANNOTATED THEMATIC OVERLAYS FROM SATELLITE STANDARD FCCS OF 1:50000 | AD | MAR-APR |
| 5. | VIVA- VOCE BASED ON LABORATORY NOTE BOOK | AD & RR | JAN-APR |

GEO-G-SEC-B-4/6-02-TH- RURAL DEVELOPMENT(90 MARKS /2CREDITS)

| SL NO. | TOPIC | TEACHER | PERIOD |
|---------------|---------------------------------------------------------------------------------------------------------------------------|----------------|---------------|
| 1. | RURAL DEVELOPMENT:CONCEPT, BASIC ELEMENTS, MEASURING THE LEVEL OF RURAL DEVELOPMENT | RR | JAN-FEB |
| 2. | PARADIGMS OF RURAL DEVELOPMENT: CUMULATIVE CAUSATION MODEL, CORE PEREPHERY MODEL, GANDHIAN APPROACH TO RURAL DEVELOPMENT. | RR | MAR-APR |
| 3. | AREA BASED APPROACH TO RURAL DEVELOPMENT: DROUGHT PRONE AREA PROGRAMMES, PMSGY, SJSY, MGNREGA, JAN DHAN YOJONA. | AD | JAN-FEB |
| 4. | RURAL GOVERNANCE: PANCHAYATI RAJ SYSTEM, RURAL DEVELOPMENT POLICIES AND PROGRAMMES IN INDIA-AN OVERVIEW. | AD | MAR-APR |

SEMESTER – VI

GEO-G-DSE-A-6-04-TH-POPULATION GEOGRAPHY (60MARKS/4 CREDITS)

| SL NO. | TOPIC | TEACHERS | PERIOD |
|---------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|--------|
| UNIT : I POPULATION DYNAMICS | | | |
| 1 | DEVELOPMENT OF POPULATION GEOGRAPHY AS A FIELD OF SPECIALIZATION. RELATION BETWEEN POPULATION GEOGRAPHY AND DEMOGRAPHY. SOURCES OF POPULATION DATA, THEIR LEVEL OF RELIABILITY AND PROBLEMS OF MAPPING. | RR | SEP |
| 2 | POPULATION DISTRIBUTION: DENSITY AND GROWTH. CLASSICAL AND MODERN THEORIES OF POPULATION DISTRIBUTION AND GROWTH, DEMOGRAPHIC TRANSITION MODEL. | RR | OCT |
| 3 | WORLD PATTERN DETERMINANTS OF POPULATION DISTRIBUTION AND GROWTH. CONCEPT OF OPTIMUM POPULATION. | RR | NOV |
| 4 | POPULATION DISTRIBUTION, DENSITY AND GROWTH PROFILE IN INDIA. | RR | NOV |
| UNIT : II POPULATION AND DEVELOPMENT | | | |
| 5 | CONCEPTS OF AGE SEX COMPOSITION; RURAL AND URBAN COMPOSITION; LITERACY AND EDUCATION. | AD | SEP |
| 6 | MEASUREMENT OF FERTILITY AND MORTALITY. CONCEPTS OF COHORT AND LIFE TABLE. | AD | OCT |
| 7 | POPULATION COMPOSITION OF INDIA: URBANISATION AND OCCUPATIONAL STRUCTURE. | AD | NOV |
| 8 | MIGRATION: TYPES AND CAUSES | AD | NOV |
| 9 | NATIONAL AND INTERNATIONAL PATTERNS OF MIGRATION WITH SPECIAL REFERENCE TO INDIA | AD | NOV |
| 10 | POPULATION AND DEVELOPMENT: POPULATION-RESOURCE REGIONS. CONCEPTS OF HDI AND ITS COMPONENTS | AD | NOV |
| 11 | POPULATION POLICIES IN DEVELOPED AND LESS DEVELOPED COUNTRIES. INDIA'S POPULATION POLICIES. POPULATION AND ENVIRONMENT, IMPLICATION FOR THE FUTURE. | RR | NOV |
| 12 | CONTEMPORARY ISSUES: AGEING OF POPULATION, DECLINING SEX RATIO, POPULATION AND ENVIRONMENT DICHOTOMY, IMPACT OF HIV/AIDS | RR | NOV |

GEO-G-DSE-A-6-04-P-POPULATION GEOGRAPHY LAB (30 MARKS/2 CREDITS)

| SL NO. | TOPIC | TEACHER | PERIOD |
|---------------|------------------------------------------------------------------------------------------------|----------------|---------------|
| 1 | POPULATION PROJECTION BY ARITHMETIC METHOD. | RR | SEP - OCT |
| 2 | POPULATION DENSITY MAPPING: STATE WISE FOR INDIA. | RR | NOV |
| 3 | ANALYSIS OF WORK PARTICIPATION RATE: TOTAL AND GENDER –WISE FOR INDIA. | AD | SEP - OCT |
| 4 | ANALYSIS OCCUPATION STRUCTURE BY DOMINANT AND DISTINCTIVE FUNCTIONS: DISTRICTS OF WEST BENGAL. | AD | NOV |
| 5 | VIVA VOCE BASED ON LABORATORY NOTE BOOK. | AD+RR | SEP - NOV |

GEO-G-SEC-B-4/6-04-TH-SUSTAINABLE DEVELOPMENT (90 MARKS/2 CREDITS)

| SL NO. | TOPIC | TEACHER | PERIOD |
|---------------|-----------------------------------------------------------------------------------------------------------------------|----------------|---------------|
| 1 | SUSTAINABLE DEVELOPMENT: CONCEPT, HISTORICAL BACKGROUND, COMPONENTS LIMITATION. | RR | SEP - OCT |
| 2 | CHALLENGES OF SUSTAINABLE DEVELOPMENT: DETERMINANTS, LINKAGES AMONG SUSTAINABLE DEVELOPMENT, ENVIRONMENT AND POVERTY. | RR | NOV |
| 3 | GLOBAL ENVIRONMENTAL ISSUES: POPULATION, INCOME AND URBANIZATION, HEALTH CARE, FOREST AND WATER RESOURCES. | AD | SEP - OCT |
| 4 | GLOBAL GOALS FOR SUSTAINABLE DEVELOPMENT: DOMAIN, CONFLICT, CRISIS AND COMPROMISE. | AD | NOV |
